

450th Knowledge Seekers Workshop; September 15, 2022

(Quick Index 22 p , Introduction, Transcription, Proofed Need to do ; Key Phrases, Words)

(Auto transcription from Elias)

Flight systems talking to each other; Satellite Souls will help bring change - each responsible for language; Process of Transmutation explained; Plants are also Gans; Change will be like hurricane; When family structure is bad - becomes normality - but STM can decide to change

Topic Index

Knowledge of Creator has no patents; Flight Systems have soul talking to each other; 2 leaders of world religions have died; Manifest dinosaurs from egg fossil - but MG fields have changed how would they look; Satellite Souls can have conferences instantaneously; What creatures will walk out of flight room; What is expected of man by U Community; Every soul will be enlightened - end of religions; Non-tangible Chip; Satellite Souls will be point of energy and knowledge transfer to their language group; When clergy take off frocks - come to you; Many of you will become enlightened; Also to transmute soul of animals and plants; STM and P protect each other; Your shape may change in if the fields are different; If STM does misconduct it will disintegrate; The pleasure of ascending to closeness to Creator; When man is ready bring cameras in to show the transmutation of soul to P; Neil Howe of KFTV passed away; We do not need to save the P - cycle of life goes on; More plasma paintings - you can submit own abstract artwork; Leading doctor to present cancer process;

Process of Transmutation is first STM goes over, then STP transfer inside it, if you feel your soul in over system and both souls agree - transfer the P; Physical features can change with different field strengths; Later will be taught how to preserve original shape of P; Transmutation process can be done by listening to audio recording - as done by Brazilian group; Crying in emotion of Soul - no tears; Tiredness comes from P trying to handle expansion of Soul; Belgian who poisoned Mr. Keshe was felt by system; Transmutation of Soul done in seconds, P takes 9 months to adjust - other dimension in U may be in seconds; But still have to mature the Souls; Child of Mitra is amongst us; Man will learn how to mutate; Soul knows how to behave in other dimensions of U; Chinese group would like English transcriptions; KF will translate soon into many languages; Xylem and Phloem of plants like the blood and lymph of body of man - everything that enters body or plants is in Gans state; No different between leaf and finger of man; How much can you accept to develop your Soul?; Adding your emotion and knowledge to a tool or something for other to enjoy - you increase your own knowledge; At moment no crystals in flight system - later will be able to take suitcase on flight; All creation has emotions not just humans - galaxies have emotion - explosion like brain hemorrhage; Sacrificing oneself is more prevalent in UC - but extremely rare with humanity; Why God preferred man to angels - Knowledge of Creation shared with man; Influential lady helping bring out technology in background - more than any KS will do; KF has powerful

allies; About praying for U - is your Soul big enough to benefit Universe?; Your Soul decides not priests anymore; Others blame you when you share new Knowledge - ignore them; Learn not to just react to things - analyze them first; A major European government looking at Gas and Energy Unit - want to see it work first; Blueprint Day planned as soon as it is ready; Suggest gas and electric T added to building when it is built, as a standard; Waiting to release new Corona version - plasma process; Talks about how Queen most evil person - was hidden from public - explains some of her evil deeds - always wanted to be the best - eliminated those who were in the way of her designs princesses and monarchs; Very positive statements about releasing T soon; Iran a religious monarch being born; Imprints from family background imprints on DNA and effects the STM - but STM free to choose to go right way if he wants to; Have to balance actions of ancestors - example of Tribe of Moses; KF has been working for a year to bring out T, all the investments but still the thing is not happening; The time is approaching and when it comes it will be like a hurricane, hold onto your seat - humanity; We are all waiting for it to happening - any day, but everything has to be in its right place and then it will happen; Child born in a family of thieves and is encouraged to steal plus the genetic influence - How can Soul be responsible; The Soul makes the decision; Talks about the lady at top of KF from pedophile family - she tried to change but could not - that behavior structure was 'normality' in family and life - she went back to it. Now KF is cleansed of Belgians and pedophiles; Will announce Blueprint Day when ready

Introduction to 450 KSW

There were parts of this workshop that gave great encouragement, mainly that we are getting very close to the release of the technology in public. In fact Mr. Keshe said, that we are all waiting for this moment to happen, for the change to start in public, and that it will be a hurricane of knowledge, and the man will not know what has hit him. Hold onto your seats it's a "handful of time" till it happens. Again he said, yes, the time is close. However, the time has to be right, then it will happen.

KF has invested all its assets and everything is set to go, but for some reason it doesn't happen. Some weeks ago there was concern, that maybe the organizations that KF invested in stole the money. But that seems to not be the case. So we have to wait and keep going ahead with our Intention, with more love and devotion, and the feeling that the time is close and our field strength is building up.

We cannot fail, but we have to start the change within ourselves, find the hidden areas in our lives where we feel stuck, and shine the light of our Soul on it, feel the pain we have denied, and realize that we were mistaken, the power, love, energy has always been inside us as the Soul. Now is the time to recognize it, and stop covering it up with sweet words. When we stand up in our own strength, recognize what is inside us, and put the goal of serving the others as our guiding force, then our own pains, discomfort, feeling like a victim, all of this dissolves in the flow of giving. When this happens the plasma technology becomes real to us, and the change comes from inside us.

Wouldn't we then become a Satellite Soul? Wouldn't the Energy of the Creator pass through us to help the others in our language group to awaken. Mr. Keshe clearly said in this workshop, "many of you will be enlightened." Our enlightenment will spread to the others. This is our job now, to seriously look at our lives in all honesty, and ask the Soul to elevate us. As it was written, when you want the Truth like a drowning man wants air - then it will happen.

There is hidden knowledge in this workshop, and maybe part of it has to do with recognizing what we have inherited from our family background, that has made an imprint on our Soul. And if we deny that, then it sits there like a festering sore, it doesn't matter how many years have passed, it is still there - until we decide to open it. It was made so clear that even though we have these imprints, and we may even see them as a disadvantage, that still the Soul is free to choose what kind of life it wants to live.

The example given was the lady who used to be at the top of KF, she tried to change but in the end went back to her roots of criminality in her family. There isn't the time and space to open this up fully, but the key idea here is, the criminality became "normality" in that family structure. That the person took her identity and sense of security from that family structure, or you could call it the "tribe," or the "herd." There is a huge complex web of emotional interactions going on in the subconscious. These got formed in our childhood when our consciousness was not developed enough to sort them out. In a way, you could say we were in an "unconscious" state, even though we remember taking on impressions, and we felt that we were conscious. This became our personality without our even knowing it. This is one of the reasons the world doesn't change. The Soul chooses to stay in this, because it gets affirmation from the tribe, which is like an energy, I call it, "false love, or false relationships."

If we are born through the Soul, none of this will occur. If we turn to the Soul anytime in our lives we can correct our past, not by changing the past, but by rebuilding the future with the Soul and its love at the center.

Understanding what has become "normality" in our lives and if that matches with the Soul, then we open the door to become beautiful Satellites to bring the change to humanity.

Thank you for listening

Quick Index

We have gained a lot of knowledge up to now, but even the plasma reactor knowledge has become obsolete with what we have been given. Now we use the reactor of the man, which is the Soul, the essence of this creation to transport and change the structure of the body of the man.

In the tests we did in December 2014, with connecting reactors in three different parts of the world, Canada, Italy and Germany, Canada and Germany were used as satellites.

Now today we are asking you to become Satellites with your Soul. Rather than rotating reactors, we use the energy within you, which is a dynamic structure of your "reactor" soul. Knowledge Seekers (KS) from all over the world are inquiring to become Satellites. You can go on the KF website and register, and help bring in the change.

Everybody can learn from my books, patents, and teachings. What you take from it depends on your intelligence and understanding. You do not need a PhD, or be an engineer, or a doctor. One of the most beautiful persons in Keshe Foundation has no education in science, and they are doing better than many of the others. The knowledge of the Creator has no patents. We teach how you were created by the Creator, and how you can change, transport, create the conditions of knowledge, and the rest of it.

This week, we have entered the phase of the "flight test by Soul." Yesterday, we switched the systems on for the first time, and to our shock and amusement, and to our pleasure, the system was back to making noises, interacting and creating fields. (It was creating energy supplies by interacting with certain reactors in the flight room), which was buzzing with noise. It was so clear that the noise had a rhythm. I received a message in the early hours of this morning, that it's like the systems are talking to each other. We recorded it. It's like they have souls.

They're getting ready to transmute and transport the Soul and the body of the Man. (It's very touching to see how man's intelligence has gone from spaceships to the "space soul." It means the same thing if you understand it. And it works the same way. This level of knowledge cannot be patented. It's a gift from the Creator, and belongs to all of us. But how will it be used to develop the next step for mankind? How will we extend the knowledge, and what can we do with it to bring the condition of peace on this planet and beyond, and not to abuse it.

We see in the past 7 to 10 days, two of the world's religious leaders have "bit the dust," (they passed on from this world). (But from one of them we see the rise of religious monarchy, and the other we have a monarchy of Crowns. These things will all be abolished. In the next few months, once this technology expands (around the world), there will be no room for these things). We have to see and understand what these new technologies from these new system in Linz will bring us.

A KS was recently in a museum where he passed by an egg of a dinosaur. He asked me, what happened to these creatures? Can we bring them back? Up to now we couldn't. Now, we can. But we have to understand what we are going to get. With the new technology we know that conditions will dictate how you will appear, according to the time and position.

(The MG field conditions of the earth have long changed since the dinosaur was around. We know the Earth is gravitationally being pulled into the Sun. During the time of the dinosaur the Earth was farther away from the Sun. At that time say for example, the dinosaurs were 4 meters tall, then today, due to the atmospheric and other changes, they

may manifest in physicality only at a height of 2 meters. However, in essence, the soul of the dinosaur is still the same.)

We will see this in the new flight system reactors, which are coming into operation. When we put you in one system you might be 2 meters high. (Then, if we create the conditions of planet X in the other system and then transmute you there, you might only be 1 meter tall, even though it's in the same room. You might be puzzled why your own manifestation has shrunk, and how come now you have four arms instead of 2).

This is the reality, which we have developed technologies for. It will not stay as a theory, but it will become a technology. The system is set up and it allows us to (see how you will manifest in the conditions of the destination. In the machines we are testing, you might appear in a different shape or size, even though it's the same machine.)

(If you remember I taught you this in some of the teachings, when I said, "give me a fish tank and with 1 drop, I'll give you a fish." The soul of the fish is in the drop, and the fish manifests itself in the water, as it wants.)

In the Linz center we have a fish in a fish tank. (We'll transmute this fish to another tank. That is we'll move the soul, and it will manifest itself in another tank.) We'll show the transmutation of the fish, animals, humans and the rest.

It goes back to what the Prophets said, "even a stone has a soul." Now we have a stone, as an egg of a dinosaur. What happens when we enlighten the soul of this stone? Would we get the dinosaur to show its beauty. This is an exciting time in research and development, and new understanding will come forward.

If the robe of the Christ (Shroud of Turin) is true, and if it carries the essence of his light, then with 1 thread we can manifest the soul (and physicality of the Christ.) We will also know if it's a false robe. And if the Jews have the clothing of Moses, we shall (manifest the same) through the understanding of the technology. So be it with the other prophets. So be it with those who committed heinous crimes. We'll bring you to answer to humanity, why you did it. Then we'll learn from it, so that our children will never commit (such crimes).

The new technology brings a new dimension of understanding. As you become Satellites, we can have conferences in any corner of this planet instantaneously. (You as a soul, will become guests of the souls of the planetary system.)

(I was asked if we have permission from to Universal Community to go outside of this planet? I said, the permission was given, and that's why we are here, to get it working, to let man out. It means man has reached the level to understand, that within him is a powerful source of energy and life, which in the universe is called, the Soul of the Man (STM). By your own intelligence you either extend its (power) or you restrict it.)

We have started the flight system tests for transmutation from one system to another. But the interesting part for us is, how do we see the STM in the new system? How would we communicate with this soul, once it arrives from its destination? For me, it's easy, I know what to do. But humans will have a problem because they are so physical and they have to see something to believe it's there. But the beauty of it is, the Soul will confirm (it to the man.)

Those of you who have registered to become Satellites will be contacted when the time comes. (Be ready and make your Soul accessible to receive, whether it be from the Souls of the Man, the Souls of creators of other kinds of lives, or from the Souls of the Universal Community.) Do not be surprised if you see and feel new things around you. The essence of the presence is very strong.

Yesterday, we turned the system on for the first time and we felt it in the room. It was shocking. Even with all the experiences we have had, we still got surprised. We understood we were in the presence of others, even though we couldn't see them. We could feel them, because in our system we have created a condition, of "a position in the universe." (By doing this, our system has become accessible to those who would like to contact us.)

It will be interesting to see in the coming time, what creatures of the Creator will walk out of the flight room. (Mankind will become familiar, and be friends with the new creatures of the creation.)

Whatever I have said, I have delivered. Be ready for this change.

Will the Austrian immigration officers have visas ready for the "Man from Planet Zeus." How do we admit them into Austria? Do we create for them and other citizens of the universe, a birth certificate as they walk out of the room? Do we treat them as celebrities, or as strangers? Or do we treat them as one of us, at the level of the soul?

The reality is that mankind has entered what I call, the "zone of interaction with Universal Community, and with the Soul of himself." In the next few weeks, introducing the secondary set of what are called, spaceship units, will create mayhem for many of you, and will change the course for many of us.

In our flight system we can keep you (in the condition of Earth, or move you to Mars, or to another position in the universe, and then bring you back to another (??) , and the return (back to where you started). You will remember all of it. Every language you spoke on your journey will be in your memory.)

Our systems are set and ready to bring the new technology forward to all of us, irrespective of our position on this planet and beyond. The system will bring the beauty of the Creator.

In the coming weeks, we'll try to get into communication with those whom we consider to be members of Universal Community. I'll make arrangements that we can listen to the communication and the words of the "Man of Universe." We'll find out what is expected of us, and what we have to do to reach the ultimate goal of the opening to the Universal Community. It will be what you call, a "message in a bottle." In most cases the message will not be heard by the ear of the man, but will be heard by the Soul of the Man, and the mankind will respond to it.

When we do this, we'll see the end of religions, and the end of abuse of the frock in the name of God. We'll see the end of all what we call, religions, because every soul will be enlightened. Then we'll see what mankind will decide for itself, and now to go to the next step. The technological development on this planet will not stop, because it's part of the pattern of living here.

New technologies will emerge and bring new understanding to the work all these processes. As I said, we'll introduce new kinds of Chips, which will have no dimension of tangibility. The Chinese (will not be able to boycott it, nor the Americans restrict it.) Every nation and every man, will make what he needs. It's customary that when you inaugurate a new ship you break a bottle of champagne on its bow. This has happened yesterday, and we are inaugurating the opening of the first space reactor, which allows the STM to travel from one point to another, (from) the point of observation of the man.

This technology cannot be written to be patented. The technology of the Creation has to be felt by the STM and understood, that it has no patent. Enlightenment is the patent. Enlightenment is understanding the patent of the Creation and the Creators work. We'll bring you more and more of this knowledge, as we open the door. We'll open the door of knowledge step by step. We'll bring this forward to the point that most of humanity can understand, see, and replicate it.

It will not belong to any single nation, culture, nor to one person. It belongs to all of us as humanity and it belongs to the Universal Community. It's a gift to mankind, for him to become kind to himself, that he can be a kind man. That he can be kind to the rest of the Universal Community.

(Yesterday, during the pre-testing, and being in the room, and trying to understand if the systems are ready for the next step to bring the change. It occurred to me, that the man has jumped across the knowledge of the Creation, and the Creator. This leapfrog has been so huge, that man cannot believe it himself, that it is even possible.)

The knowledge has to be spread in a such a rapid way, that no nation or culture will be left behind. (It is essential for us, as the "Satellite Souls," to spread this knowledge across this planet. We are not using the people who volunteered to be Satellites, just to transmute. We are also using them to transfer energy to the other souls in their language group and in their environment. In a way, the Satellite Souls become part of the Universal Council "Soul Members Support" team.

You will see the next step, which is planned for this part of the what I call, "expansion of the knowledge." It's not that we bring you things. It's that we use your soul. In a way, you become messengers of the message of the knowledge of the universe, that the people around you, in the emotion and understanding of your language accept. It's not teaching by making MaGravs and Gans's anymore. Instead your soul becomes the teacher of the others, for them to be elevated in understanding the teaching of the knowledge of the Creator. It can be done in different ways. But the whole purpose is to change the ingrained habits of the Soul of the Physicality (STP) and the physicality to not kill and destroy anymore.

This way it's not just individuals, but the whole of mankind, who walks away from it, and accepts it in Totality. Those of you who volunteered to become Satellites, have not understood what you have walked into. You become absolute Satellites. When you have a satellite over a country, its waves covers the whole country and every creature in it. It depends on what you have done, and if it is for you to receive it. These Satellites of the Soul are connected. We do not need to position you in space to function, since you are already connected (to each other, and you are spaced in the position you need to be.)

From his inside essence, we want to change the mankind to stop the killing, war, and conflict. You'll become the ambassadors of peace. You are the Satellites of the Peace. It is your job to spread this, in a way that it changes the ingrained habits in the humans, animal, and the rest of the creatures on earth. Your Soul has chosen you to become Satellite, and it's your responsibility to change the course of humanity. This is thanks to the new knowledge and for nations as a whole to understand and to accept.

Do not be surprised if you see the clergy coming to you when they take their frocks off, and walk away from what they preached, as now they are enlightened to the knowledge of creation. We expect, many, many clergy you leave their frocks behind. Some will even hide that they were clergy, because of the abuse they've done while they were wearing the frock. The time for this (is very soon), it's a handful of time, not much.

(The new cycle begins with, "the end of two" (leaders of religions). The 2 have completed. Now we are waiting for you to start the cycle. It's how you move ahead on it, and how you develop the understanding). The center in Linz is a beacon of knowledge from the Creator, and you are the Satellites to receive and spread it, and nothing else. Don't become arrogant, (that you think you have become something.) Be humble, that you are. This will carry on with all of us. This will carry on with many of us who came to Linz in the past few weeks. You'll find out, that you've already become part of the Satellite system.

When we listened to the two systems yesterday, it's literally like, they are in pattern of adoring each other, the noise is so intriguing. And you feel the emotion of peace, harmony, and tranquility, and in a very, very specific way. "This is what I came here for. You feel part of it."

(The systems are set to make the change. The systems are set to handle the different understandings of different souls. We observe how each one reacts. We see how you as souls come to understand the Totality. And you will understand as a whole, what will happen to us as a human race. What the future will be for all of us. We'll see how we have to have a clear Soul, that will not allow our own tainted desires to interact (and interfere) with what is to come.)

We are preparing you for the next few weeks to make one of the final steps, to become passengers of the Universe. Those of you who will be the passengers to Moon and Mars, will give our KS the opportunity to understand the process, and from then on, you will become passengers of the Universe. (It depends whether you can make the light of your Soul to be your home, and if you accept it to be your home.)

In the next few weeks, as we extend the work of the KF in Linz, we also extend the knowledge of humanity. In a way, we become the center of spreading the knowledge through the Soul, and not through the books.

Many of you will come to be enlightened, and you will not understand how it happened. In a way, you'll receive the knowledge without a patent. As was said in the Intro video, that Mr. Stephen Hawking cannot steal it from you, and he cannot cheat.

It's the purity of the knowledge, that you will receive through the patent of the Creator, and then, will you call it enlightenment? How you handle it, is your decision. How you bring it about and share it, is your decision. We will still develop different aspects of the technology in the physical dimension. But because you'll become so advanced, you might think that the you do not need it. However, if you transmute to the matter state, you still need that knowledge to be able to (survive and do things).

In the coming weeks, we'll ask more and more of you to come to Linz. In a way, we will request you to come and go through the system, because there is a bigger plan in the background for this purpose. (You can bring with you other creatures of Creator, that are not very big in size. Just like we are transferring the soul of the Chinese, English, and the rest, we want to transmute the souls of the animal and plant kingdom as well. (We want all this information to be in our system.) It's our responsibility to change everything, and not just the man. It's our responsibility to elevate (all the created souls on this planet.)

I have taught you a lot in today's teaching, if you have understood it. There are a lot of hidden messages in this teaching. Those of you who have understood will act upon it. Those of you who are still waiting, you'll keep on waiting "till the cows come home." But by coincidence, there are no cows in the universe and they will never come home. You will be waiting for a very long time, which means you have not understood the essence of the knowledge. But (in) time that will change. As I said, when the time comes, we shall (be) enlightened. (You will come to understand, that the knowledge is shared equally to everyone, regardless of what you do in life.)

Transmutation of the STM is very different than transmutation of the physicality. (Transmutation of the soul is easy, because the essence of every cell, and the essence of every being within, is transmuted. Whereas with the physicality it is within it, and it does it itself, because it wants to guarantee its existence.)

(It's like when you cover your head with your hands when you are in danger. You are protecting the Soul. Now the soul protects that physicality, so that when it manifests itself, it guarantees its own existence. In a way, it's a mutual interest for the STM to protect the physicality, because when he chooses to manifest in the dimension of physicality, he has something to manifest into, so he protects it.)

Remember one point, that it does not matter what shape or combination of shapes you'll be manifested as anywhere in the Universe, or on this planet. What matters is, that you will have a Soul within you, and it's your job to protect it, and to not to abuse it.

(It's like when you are dying of thirst and you are trying to get to water. Just as you reach the water, don't drown yourself in it, because you think (your ordeal) is over, and now you can do what you like. You will find out, that now, that your soul has learned how to free itself from the shackles of physicality, your physicality will be very temporary.)

Then the game of Mitra, to do good, think good, and act good begins. It doesn't matter in what state (the STP has manifested.) The preacher and the teacher is you. And the only person, or entity, that can go wrong for both of (you), will be you.

When the Soul does a misconduct, that will be the end of the life of the man, as the Soul will disintegrate itself, to become the food for the next cycle of creation.

Many of you have been wondering when does the Soul ends. The work of the Soul does not end. (In the following paragraph I think this is what was meant. The Soul will have to learn how to live in both dimensions of the Soul and physicality. That sometimes the Soul life is better and sometimes the physicality life is better, and this balancing of the two will bring about a perfect creature.) It's not the fear of demise, rather it's the pleasure of ascending to the levels of the closeness to the Creator.

We just guide you to it, but you have to make the decision. Very soon no one will go to the churches, mosques, synagogues, and temples, because the man has become wise to his freedom, and knows the temple of the man is the STM. Actually, the temple is the Unicose. Why do you choose a little what I call, bricks and mortar.

In the coming weeks, once we feel the humanity is ready for it, we'll take the cameras inside the flight room for you to see the transmutation of the souls and the conversion of the soul to physicality. It'll be an interesting time, because then it cannot be denied. A new method of transmutation and transportation will be right in front of us.

(I told Dean, that he has to wait until the human race is ready, to see, accept, and bring the change, then he can come in with his camera. We have to wait until man is ready,

because we don't want anybody falling overboard. Everybody has to be onboard, (that everybody receives it.)

The whole purpose of the teachings of this week, last week, and the coming weeks, are to prepare you for the encounter with Universal Community. Understand the teaching and be prepared to encounter your fellow brothers and sisters from Universal Community, not by theory, but in reality. Because we're preparing you for that point of what we call, rendezvous.

It's for you to accept. How much are you willing to change? Or do you want to go backwards to the UFOs? When we go forward, we travel in the dimension of the flights of the Creator. Either way there is no harm. Either way, there is no danger. (We have to learn the elevation of the STM, to go beyond the reach of physicality.) This has been the whole purpose of all of these 450 teachings.

End of part 1 Quick Index 450 KSW

Memorial video for Neil Howe who passed away this week. We have a lot of good memories from him in KFTV.

Somebody said, "why can't you save every life?" We do not need to save the physicality. It's the soul which goes free, and that's the celebration of life. This is how the cycle of life goes on.

A third set of paintings have been commissioned, called, a planetary system. Since there is a lot of interest we have agreed to make 6 sets of plasma painting. You will be able to choose a picture you want painted, as long as it is abstract and not copyrighted, or belonging to someone else. This is an extension to the Keshe Foundation work.

The Gans Paintings always have to be in pairs, that it creates a diversity of fields, and an emotion of the fields.

We are still planning to do a Combined Gas and Plasma Energy Unit Blueprint Day.

Medical application of the technology will go through doctors.

One of the leading doctors who has used our technology for cancer on himself says he will release the knowledge of how he handled his own cancer. I'm sure that once he does, his hospital will be jammed packed with Knowledge Seekers, seeking a solution for their conditions.

Q: No cancer or illness can exist in an alkaline environment, no illness.

K- Who says that? There is life even in an alkaline state too, depending on the strength of the tissues. How come people with a high alkaline condition in their body still get cancer. It all depends on the strength of it, and how life is created with it.

Q: What is the difference and relation between the physicality (P) and the body of the man?

K- It's the same. The physicality is what we can visualize, what we can hear, what we can physically touch. And the body of the man is in the physical condition, you can touch it, you can see it.

(In the flight systems when the Soul cocoons the P we can still physically see the body. But when the Soul is engaged inside the body we cannot see it.)

(In the new tests of transmutation from one system to the other, the energy will be still connected on one end, while (at the same time) will manifest itself in the other system. It'll be very interesting to see the reaction of the people, when they see their Soul manifesting itself in the other system.)

(What actually happens is that when you are sitting in the first system, we expand your Soul, or the center of your energy, and then we tap into it. Then with the technology we have developed, we take you across to the other system. Then you'll see or feel the existence of another energy in that system, while you are still sitting in the first system.)

(The most important thing for us when we test the first set of people, if we reach that point, is to understand what they feel. Can they feel the presence of their Soul in the other system? We know most of them cannot see it. But what matters to us is, if they in essence, feel that they're in two dimensions (at the same time).)

(Once we've done that, we go to the level of the Soul of physicality (STP), which actually is every cell of their body. Then we transmute the STP into the center of the (STM that we transmuted over first.) Then we have to get an agreement from the Soul, which landed in the second system. At the same time we also need an agreement from the Soul in the first system as well, that we can go ahead and transmute the physicality to the same position in the second system.)

(After we've done that, there will be nothing in the first system. Then physically we'll see you walking out of the second system. You have become a physical being in the dimension of the fields, which we created. But as you'll be walking into the same room, which you came from, your physicality should be the same. Because you have accepted the condition of the time, place and position.)

If I bring you out in China, United States, or in the Amazon, (would you actually look the same as you did when we transmuted inside the same room? Because now the conditions are different, it's a different culture, different understanding. It will be very, very interesting to see what happens.) (Even you might be surprised by hearing the same the voice, having the same feeling, but your physical features could be different.)

(There are ways to do it, and patterns that you can use to hold on to the (same) physicality.) This we'll teach you in the future. That way you can still be a Chinese man in the Amazon. It's another understanding of the knowledge. This is what we call, the physicality, and the energy, or the STP of the man. If you can see it and touch it, then you are part of it.

Q: Every Monday the Brazilian community meets in a discussion group about the KF technology, after our Intention for the world peace. This week we read an excerpt from the 449 KSW about Satellite Souls and soon after, together we listened to the audio recording of the Mobile transmutation flight test done in Rick's program by Mr. Keshe. The next day a group of Knowledge Seekers concluded that during the test they had different experiences, but with similar conclusions.

The experiences brought up very strong internal emotional issues, because they felt that the physicality interfered a lot in the process. They all reported feeling physical symptoms such as heavy head, crying, sore thymus, and tiredness. So, the question is, why did these similar emotions and physical symptoms occur with these people from our group? What kind of connection did these souls establish to feel the impact?

K- We see the same emotions with many of the KS who go in the flight system. It's interesting what you are reporting here, because it means we have actually succeeded in transmuting the emotion of the effect of the system, even by recording.

(Many people come out of the system, man or woman, the age is irrelevant, and they tell us that they were crying, but we don't see any sign of tears, especially on the women because their makeup is untouched.) A lot of them speak about tiredness, pressure in the back of the head, and a lot of emotional interactions.

(What has happened with your group shows us, that you don't need to physically be in the flight system to transmute. You can do it by recordings. Therefore, we can also spread this knowledge by recordings. According to what you reported, the effects are the same as those in the flight system. (It was a test to see if we could send the emotions forward.) You're the first group that has done it by recording. I think (there might be) another group as well. So now we know that even the recordings give you the same emotion.

(The system we setup to test that day in Rick's had been specifically setup to transfer that knowledge in that way. In the future, we'll do other tests with the KS in different teachings, because it's important for us to see (how they work.) We went to Rick's, because people from all over the world attend his program. What would be the effects on our system when we go to the Brazilian community, or the Italians, Germans, or the others. This is all part of the tests I set up, because we have to bring balance between all the languages and cultures.)

It's nice to see that even by the recordings, we still create the same effect. The tiredness and exhaustion comes from the physicality trying to handle the expansion of the Soul.

That's all it is. You use energies to allow the expansion. In a way, you subside a lot of energies.

That's why when you go to sleep you're so tired, and the whole body stops, because it uses the energy to repair, to be ready for the next cycle of abuse of the body in the dimension of physicality. You use a lot of energies to tame this animal, which is the physicality of the man, to allow the Soul to expand. (You need the sleep time, because a lot of energy needs to be diverted, so that it weakens the shackles of the Soul's prison.

(We tested this yesterday with a couple that had a very big problem between them, in their relationship. I wanted to know exactly what's going on between them. When they were in the system it came to a halt. When the system halts it means they are taking so much, that it pressurizes the system so that it cannot run. It stops, but then it starts up again. We watch to see which of the couple physically moves. These are the energies, which one uses to control the physicality. When this happens we see the tiredness, because you're using energy. We understand this process well.)

(The same thing will happen with people who volunteer to be Satellites. They will send a message of peace, which is received by the Soul. Now that Soul has to translate it, to make the physicality peaceful.)

(I tested this with that same couple. Yesterday, I asked them how their relationship has been between them since the last time they were here. Interestingly, the wife immediately said, "it's wonderful, it has greatly changed, and it's beautiful." So, we allow the two to understand each other, to share and interact.)

(I observed this by letting each one be the captain and watched what happened. When the man was captain the system ran smoothly, but when the lady was captain we had trouble with the system. So it told me that the problem was with her. She was putting so much pressure on the system, that, "I'm in charge now, I'm the captain," and that our system showed it.)

I have done a lot of these tests over the years. (Years ago in Italy, in the Inzano, I put the Knowledge Seekers in front of the dynamic systems. I knew this guy was planning my murder. I asked him questions, and I saw the operation. The lies he was telling me was there. It's actually, the guy who poisoned me to kill. I knew he was there, and strangely enough he was a Belgian.)

Our systems are tuned to these things. This is why we put you in Chair 1, 2, and 3, to elevate the physicality, then the STP, so that they can work in harmony with the STM. (With what you've told us about listening to the recording, shows us that (the transmutation) can be transferred to other dimensions and other people.)

It confirms for us a lot of other things, which we wanted to design, plan, and do. (It brings us more information, that we can vary it in different ways to learn more.) (It's like especially when the ladies say they were crying in the system, but we don't see any sign

of tears on their makeup, it shows that they're in dimension of the emotion, of the Soul encapsulating the physicality. It's like when you cry in your dreams, when you wake up there are no tears on your face.) The Soul has been operating in what they've witnessed, in the dimension of emotion. A lot of knowledge of how the physicality behaves has been gained through this.

Q: What is the relationship between the transmutation, which is done in stages, first the P, then the STP, and finally the Soul, and our creation in the womb of our mother. Why do we have to wait nine months to be born? When the transmutation process can be done in seconds?

K- The transmutation, the way you see in a physical dimension with the present life of man is through the dimension of physicality, not through dimension of the Soul.

The children of Mitra will have that possibility. But they still have to mature the Soul. And that maturity of Soul needs the dimension of time of accepting the physicality. In the Space, when you create in the D of the Soul, you will not wait 9 months. What is nine months to you here on earth, could be a millisecond in another dimension.

We are preparing man for what is to come, and not the way things are now, today. The child of Mitra is amongst us.

In this new cycle of life, we'll know how to handle the Universal Community, and how to mutate. Because the Soul will be created first, not the physicality.

What you consider as nine months here, it will be seconds in the other positions in the universe. Our physical Soul cannot handle it. "But the two being born through the Soul of the, what do you call it, the two Souls can handle the mutation to come." Because priority is always given to the Soul, and not to the physicality.

(Going to another dimension is like going to another country, you have to learn the new way of living.) This is the way of Creation. We learn it very, very quickly and he has started the cycle ?? We are part of it. The new cycle in the life of the man lives the cycle of man, but generating in the dimension of the Soul.

The new generation of the STM knows how to behave in the Universe. "It's a big difference between the P, and the STP, and how they will interact."

The Chinese KF group was wondering how to get the English transcriptions. Mr. Keshe didn't know about it, (and nobody mentioned that KF Brazil has all the unofficial English transcriptions on (archive dot org). Maybe someone will pass the message on to them.)

Very soon KF should have a lot of different languages translated and transcriptions available. (The transcriptions have to be corrected, because sometimes the voices are misread and misunderstood. The English transcription is still going on by a couple of people around the world. They're still transcribing it, and it is done automatically in

Switzerland. I know, and it's all up to date, day by day. KF still has to look into the other languages. These things take time and need a lot of financial backing.

Q: What is the relationship between xylem and phloem fluids in Vertical beings (plant life), with plasma and Gans?

Rick reads what Wikipedia says about xylem and phloem.

K- It looks like a blood and lymph circulation, doesn't it? (But you say, "what does it have to do with Gans?" (For example, a banana is a matter state banana up until it enters your mouth. Once it enters, it is now in the Gans state, because the dynamic Gans's of your body creates an environment of the M fields of a Gans.) It's the same with the plants.

(The minute materials, gas or energy enters the dynamic structure (of a plant), it becomes a Gans state. There's no difference. Then the MG fields determines where it will go,) and how it is needed. It's just like your blood and lymph, it's in a Gans state.

There's no difference between a leaf and a finger of the man. Plants have many fingers. That's all it is. Our body absorbs energy, so does the leaf. Then the minute that energy is absorbed, it becomes part of the structure of the body and start circulating as a Gans.

Q: Is there a connection between empathy, which is the ability to understand and share the feelings of another, and the development of a Soul?

K- Of course there is. But how much you can accept, and how much you can develop what you have accepted?

(Mr. Keshe uses the example of tools, in that we use tools all the time, but very few people even think about what they are using, or how to develop it further, that it would make somebody else's life easier. You add something of your own experience and knowledge to the tool, or take something away, that then it becomes better for yourself and others, and it changes the purpose.)

If you understand the knowledge of the emotion of it, then you can do anything with it. All are connected, because one leads to development of something else, one leads to conclusion of something else. As partly being an engineer, I love gadgets. I make little changes in them, that it makes their use easier, or brings a new dimension to it. It brings a different pleasure to using the same tool, and then you keep on using it.

(It's the same with other things in life. When someone understands something, and adds his emotion and knowledge to it, it changes and others can enjoy it. By doing that, the person also elevates their own understanding.)

You cannot take crystals with you to Linz, it could interfere with the flight system. But very soon they will increase the knowledge so that you can carry a suitcase with you on your transmutation flight.

Someone wanted to do the Satellite Soul free. It was explained, that KF has become wise to these "free jobs." (We see it, we understand the whole process, and why we are committing ourselves to be a Satellite Soul.) There are a lot of, what I call, misguided people around, and our openness became the cause of our pain. So, we closed many, many, many, many, many, many doors. They used us for abusing other Knowledge Seekers and all sort of things. So, we learned.

It's you who taught us what to do. Even some of you are very sincere with what you want to do, but those who abused us, and abused the system taught us how to block the system. We used to share a lot of knowledge in all aspects. Then we found out, some of the people were fake, and some were only there for personal gain, and gradually it became a big headache.

Q: Do other living humanoids or entities in the universe, have the same variety of emotions, or, what we call, noble emotions like empathy, as human beings do?

K- Emotion is part of the characteristics of creation. When you have fields, at a given strength and mono, somewhere they eventually step down in (field) strength, or they get absorbed into a higher strength. At one point or another they slow down enough to manifest themselves in dimension of physicality. (From the beginning of that process, to the point down the line, where it creates a strength, at that point it will show itself and manifests as an emotion. It depends what name you give it, empathy, love, fear, or whatever.)

We see emotions even in galaxies in how they behave, are created, and how they explode. When solar systems and galaxies hit each other it's like when you get a brain hemorrhage. What caused the explosion? Was it pressure and stress. What was the emotion it was experiencing. Emotion is not the exclusivity of man.

In the coming time, when our scientists become wise enough, you will be able to register the emotion of the fields of the galaxies. NASA and other places have shown pictures of two galaxies heading towards each other to collide, or whatever. Will they actually collide? You have to watch the space to see. Would the emotion of the galaxies allow them to hit each other? (Or like when it looks like you will run to somebody with your car, but then you just skip around them. Sometimes you might hit the other guy, but sometimes we go around them, because the emotion is not to hurt. Emotion is not exclusivity man, even though we would like to think it is.

Q: Can you talk about sacrificing ones life for the good of others, without getting anything in return?

K- It always happens. But actually it's more prevalent in the Universal Community. On Earth, it's very, very rare. It's very rare.

Q: (Do you mean it's just for doing service?)

K- It's not service, it's part of allowing the others to exist. You put others existence ahead of your own. (Because when you give, you become part of a bigger structure.)

(Why is Mr. Keshe stressing that it is very rare to unconditionally give to others. A lot of people talk about unconditional giving these days. Or is it just talk. The unknown motive is really to get something?)

There is a discussion about the millions of Iranian Shia Moslems who go through the streets barefoot and become pilgrims. Mr. Keshe clarified more about the tradition.

Q: Why (was it written) that God preferred man to the angels? Because (man knows the things the angels don't know.)

K- Maybe the answer is what you are spending time with now (meaning the new technology). Why did the God (prefer) man to the angels? Now that man has been given the knowledge of the Creation of the Universe, you can see his beauty. God knew what He was doing. One day mankind will understand what gift of knowledge he has been given.

We have a lady who is not a KS, but she is doing beyond imagination things. She has been touched by the knowledge. She is doing things that KS would not even dream to do. I wrote to her this morning and said, one day mankind will come to understand the gravity of the work you've done for humanity. What she has done is beyond the imagination. She understands, that through her help, what this technology can do, and the change it can bring.

She's in a position of power to bring that change, and she gives all of her life, 24 hours a day, to bring that change. The first time she walked through the Linz Exhibition Center, she said, this is what we've been waiting for. She is extremely well positioned, as someone who can bring that change. She has given her life to make sure the change comes.

She is a blessed soul. She is like an angel, but she is human. These kind of people do things, that no Knowledge Seekers will do. None of our Knowledge Seekers will do what this lady is doing. Internationally, she is in an extremely powerful position, and is (promoting) the Keshe Foundation. She doesn't want or ask for anything. She just says, I can see, that this will bring the peace, and I'm in a position to bring a condition for that to happen.

The KF has very powerful allies, and supporters in high places in governments. They know what the change is and what it will bring, and they know how it will effect us as a human race, (and they help.)

Q: Is it a better in my personal prayers to pray for the whole universe, or just the good of all?

K- Your Soul decides, not man. If it is that, maybe you have such a big soul, that the universe can benefit by what you give. The time of having somebody approve or disapprove is gone. It's you, who has to understand and judge what you are doing. There is no priesthood (anymore to ask) if it's correct or not.

Q: I try to share plasma knowledge by being a good example of health, morality and conduct. Some people are curious and ask for knowledge. I try to adapt answers as well as possible. I try not to intervene in people's lives. What is the best approach when they blame me for various things that happens in their life?

K- Let it be. They'll blame you for it anyway, good or bad. So, you carry on the way you do. They are what I call, members of the party of "wind," it depends which way the wind blows.

Rick shared his experience with "Internet Trolls," when Mr. Keshe told him to "ignore them."

Mr. Keshe expounded further on a story about his body guard and how they are trained to react automatically to a situation without thinking. He said to him that, this is not the way to be, you have to first analyze and see what is there. It's the same with what Rick said, when he said to just ignore it. Ignoring it is harder than actually dealing with it, because in dealing, you put your emotions out.

(Mr. Keshe further told how when the Belgians where in the KF they used this method to try to control him, by constantly creating situations that he would have to react all the time. He learned how to let thing's be. They use your reaction as a way to control you, so if you don't react the way they expect you to, then they have to find another way to get at you. While they're busy doing that, you can carry on doing your own work.)

When we go into the different teachings we always go as Knowledge Seekers. Nobody goes in as a teacher. It's understanding, that we don't know everything, and that's the pattern of life. (When we allowed people to teach at KF, then they started calling themselves professors, and that's when they lose it and everything falls apart.) We are there to learn, and we always learn something new, one way or another.

Q: Could you speak a little bit more about the negotiations with Europe countries regarding the delivery of the generators and gas units.

K- There are a number of European nations who are looking at the units. One of the leading European nations is pushing us to show a working system, that it can be changed. We'll try to give a Blueprint Day for Gas and Plasma Energy Unit to see how we can bring it out. They want to see it working and then how it can be adopted rapidly.

People who don't live in Europe cannot comprehend what is cooking up here. We have Prime Ministers, Ministers, leading industrialists, all talking about the massive problems,

recessions, and lack of gas, and energy, and the prices going up. Governments are trying to find a way to handle the situation.

(We suggested that from now on all new buildings should have as a standard requirement of having one of these Gas and Energy Units built into them, to provide for gas and electricity. This way the responsibility is passed on to the house owners and the builders, instead of the governments.)

It's inevitable that technologies like this will emerge. (Then you don't need to put pipelines into the streets, when it is produced on site at home. Then they tax each house, since they have to find a way to get their money. It will be just like when you buy a television license, you pay an annual fee to the government.)

(We see very strange things happening with leaders in the Russian oil and gas industry, people accidentally falling out of the window of the hospitals, or getting thrown out, or some having their children murdered.) We don't know who sits with whom, and how much of this pressure is real. But some people are making money out of it. (Generally the situation in Europe is what you call, diabolical, to what limits it will be pushed, we'll soon come to understand.)

(KF is working on a package for the spread of the new version of Corona. We'll wait to see when it is necessary to release it. We heard the Chinese are closing different parts of their mainland, due to the new Corona. We have to see if it actually takes hold as it is expected.)

I received a request about if I would like to make any comments about what has happened in the past week in UK, and in Iran. We have no comments. We wait for the destiny to show its time.

(When our team masters the Gas and Energy units in a good way, then most probably, it will be released internationally. That's the only way it can be done.)

Keshe Foundation will most probably release a lot of new technologies in one go, and we go for it all in one go. Because we are more or less, an NGO. Once we have the securities for the long term steps of the Foundation, like the way we opened the patents, this time we'll open the other things.

We will rule. As I said in the last week's teaching, we're just waiting for a piece, few pieces to come together that completes it. Then we are ready to make that move to bring the change.

Q: About the Queen of England who died recently. She's a soul taking a new position. Is it related to what field strengths are happening around the planet? Or is it individual?

K- (It is based on her as an individual.)

But essentially, my first reaction when I heard the news, was, thank God, one of the most evil souls has left us. A lot of people think her in a different way, (because they haven't been told the truth about what she has done.) I think we might see a better life for humanity with Charles.

(If you were aware of all the evil this woman has done, then you would understand. She was very, very evil. But we don't get into conflict with another royal family, or whatever. She has personally been the cause of huge, huge, huge problems.)

(You have to understand, when you have to be the only one, or the longest one (meaning monarchy), or the one everybody loves, then you do everything for the others not to be there. This behavior started even before she came into the throne. There was the selfishness of, "I have to be the only one." We see this behavior throughout the whole series of events of her lifetime. (Now people look at it in the way the Media tells them, but we look at the facts as a whole. As I said, my reaction was, thank God. Let's see if the other guy is different than this one.)

We have now the same situation in Iran. There are rumors and talks about Iranian leadership, and it's the same situation.

We keep out of these things. But we know what they really have done, and that information is not in public. Anybody who was better or more popular was eliminated. Anybody who was loved by public was somehow put aside. This was a habit of this woman. For (her to be the only one, the best, and the rest of it, lead to a lot of crimes.)

Of course the nation will change, now that she is gone. She was one of the most selfish people known. She had a habit of doing things her own way. If you look at the situation with Princess Diana, and the wife of the new prince, who had to literally abdicate and go to Canada, why? Because they were more popular? There couldn't be another woman above her, that was more popular, or who was loved by the nation more, or interacted with the nation more.

The revolution in Iran was set by the Queen, because the (Persian Monarch was over 2,500 years old, so it had to end, because she had to be the longest monarch. When Iran celebrated 2,500 years of monarchy in the 1970s, she sent Princess Ann instead, as an insult to Iran. World leaders attended, by she sent Princess Ann. Princess Ann in Farsi means more or less, "shit." It was the biggest insult to the nation. She had already planned to end the Persian monarchy, so that she would be the only one left. Historically she's done this all her life.

To do this, she caused millions of people to suffer. Most of the Iranian refugees we see across the world are because of her actions. We see all the Libyans and Syrians scattered around the world. She wanted to rob the central bank of Libya for 140 billion in gold. (That gold is now in the Crown's name, not in the name of England. They become part of the Crown Jewels. The Libyans are still paying for it with their lives. The Syrians are still

paying for it with their lives. because she wanted all the assets to become part of the Crown Jewels of England.)

(Over the years when the British died in different parts of (their empire), where did their assets go? It was the same at time of Queen Victoria. The pirates of the high seas became Lords. Her life has a very, very, very dark background. It doesn't matter how they're trying to "butter up" her life, or how they paint it. She lived an extremely devious life. Maybe with Charles we'll see a different thing, because he tasted the pressures and the pains of it.)

There are reports of the Ayatollah Khamenei of Iran, being in a dangerous position with his life. In Iran we see a new cycle of "religious monarchy" getting born. (They said, they got rid of the Shah to end monarchies, and now they want to start a new one. Religious leaders have to come by their position through (the strength and development) of their intellect. It should not be passed on as a birthright, to the children.)

These things will gradually go out of the way, anyway. (What we see happening comes from someone wanting to gain power.) It's like if the Pope could have children, then he would appoint his son to be the next Pope, thereby the family holding onto power. Soon these things will all change.)

Q: (If a person or a Soul has these kind of bad interactions as a child, does the Soul carry this from the past? Isn't the Soul pure before it comes into the physicality? Or are there implications (or impressions) from before?

K- (There are implications that come from before. Your DNA is made from the imprints of the past, not only the color of the eyes, but everything else. It's the same with RNA. They carry the imprints into your Soul. But it is done in a different way, so that the Soul (still) knows right and the wrong. This is where the problems comes between the STP and the STM, and wanting, and holding on to the imprints. The Knowledge is kept, but (it might not be acted on.) Our actions then have to be balanced out by our future generations.)

Q: So, are you saying that the nation of the UK will have to balance many of the field strengths that have happened over the past?

K- (That is the way it is always done. It doesn't matter if it is England, or anybody else. It always gets settled. It always has to be brought into balance with itself. You may think that you have gotten away with something, but in long term you see, that you actually paid for it.)

The best example of this is the tribe of Moses. (They say it's the longest tribe in history, if you look at what has happened to them, (then you see how things balance out over time.) He came a nomad, "out of the basket," (Moses born without family), and he died a nomad (he was not allowed to enter the "Holy Land"), and these people are still nomads. The

Knowledge of Creation has to be ingrained in the understanding, it cannot be forced, (because you belong to a tribe, nor can it be passed on through the blood).)

(Another good example is with Sheik Muhammad of Dubai. He built beautiful small cities around his Emirates, for his nomads tribes to live and be modernized. But after some time they tore all the wood off the walls and built fires in the middle of the kitchen, just like they did in the deserts. Just by giving things to people does not bring the intelligence and the behavioral change. It has to be understood, inside you.) So, in the long term you always pay for it, because the books have to be balanced.

(About a year ago we set up a plan for Keshe Foundation to bring in the new dimension with the release of the technology.) We worked and did a lot of things with it. Then a few months ago we asked help from you Knowledge Seekers, and some of you helped us.

But the thing is not happening.

(The way I look at it, there must be a reason for it. Maybe it's not yet the time and place for it. Because if it happens it'll be so fantastic, and it will bring the whole change we've been waiting for. But I don't push it, because it means it's not the time and the day for it. When the time and day comes for it, it will happen.)

I know that what is about to happen will bring a massive change to the whole structure of humanity. But do I go out and do different things (to try to make it happen, no.)

The people around are all waiting. We're all waiting for this thing to switch over, today, tomorrow, or next week. It's been going on like this for nearly a year. But why (doesn't) it change? Why is it on hold? Is it the time for it? I feel, yes. The time (for it) is very short. When it comes, we'll all benefit by it, the whole of humanity will benefit by it. It will bring changes beyond the imagination.

Did we have to wait for the Queen of England to die? Did we have to see a change in the Iranian leadership? Did we have to wait for Putin to go into Ukraine? Did we have to get the Germans in another position? You can add anything into it, but it means the time isn't right. That the Soul is not yet ready for the change. When it happens, it means it is ready to go. Because I know what it's going to do.

Knowledge Seekers are not aware of what is about to hit humanity. I tell you, hold on to your seats, and hold on very tight, because when we come out, it will be a hurricane, and not just a wind.

(It's not what benefit it will bring to me, which is nothing.) It's that I see the comfort it will bring to humanity, the advancement in technology and science, and mostly it will bring man out of killing and the war zones. This is the only purpose why we are doing it.

(It doesn't matter how much we suffer over the next few days and weeks. The end products will be, that no one is in charge of anybody else, nobody will wear a crown.

Man decides and man elevates his own Soul. Just watch and see what can happen in a very short time. If what we set is achieved. Be careful with a lot things.

The thing is, you all participated in it, in one way or another, with small donations, or loans to the Foundation. You all put your foot in it. So, we all are in for the change. The Foundation has put all its assets and backing into it, because I know it's time for the change. We take the leadership in doing it. We have to do it the way man does it. The old song says, "it's a man's world." Let's see where we end up, and then how the Souls will change, how we'll change one another.

Q: When a child is raised for example, in a family of thieves, where the parents are thieves, and whenever he steals he is applauded by parents and grandparents. Through them he only knows the value of stealing and doing bad things. He also has the genetic influence. How can the Soul be responsible for this, (as he was born into it and didn't have a chance with all influence of his family?)

K- It's the Soul who makes (you) to carry on with the same decision. It's the Soul. (But the Soul can go back to his roots (of goodness), if he wants to.) We had this in Keshe Foundation.

We had this at the top, top, top levels of the Keshe Foundation,. A person who was born in one of the most notorious pedophile families in the world, where the whole family's involved. They have prison sentences for raping and abusing children. (In the case of) prostitution it's like you're going to work as a doctor, and it's carried on by the rest of the family.

(The thing is, the person knows it's wrong, and for a time decides to change. But the pull and power of the family system is so strong, it does not allow it, and she goes back to it.) It doesn't matter how hard the person tries, they cannot stop it. It's they themselves who have to elevate their own Soul. Then they blame everybody else for it, but actually, they do have a choice. They have to decide, and they have to work very hard to try to overcome it, or at least cover it. But it's you who has to be on top of it, and then it can be done.

(But the problem is, if you are born into a family of thieves for example, and the whole family is involved in it, then that is their normality. It means that's the standard you compare yourself to.) (Can one person decide to bring the change, or would they be pulled back into it? What we had at KF was the person tried to do their best to walk away from it, but then they covered it up, but underneath they were still doing it.)

This was one of the reasons KF battled with the pedophile groups. They knew they had somebody at the top of the structure who had a history of prison sentences, and everything else, hiding underneath them. They knew, but we didn't know. Now we washed it out of the KF. But it brought a lot of pain.

One of the most notorious pedophile families in Europe was sitting right at the top of the Keshe Foundation. The father, mother, uncles, and everybody has been to prison for abusing children. They went back to their family. It keeps going to the next generation. They went back to their roots, because that's where they find comfort. Being in a good position at top of KF wasn't good enough. So they chose to go back. The children carry on doing the same as their fathers did, abusing the next generation.

You cannot change their grain. But the choice is there for them to change, if they want to. But when it's too hard, then they go back to the past.

Over the past 2 - 3 years, since these people are gone we don't see much of the pedophiles in the KF. We got rid of the root. They also came as the head of the KF education system, they brought their allies in different ways into KF. We couldn't understand how. We bless their Soul, I hope they find peace. But it's back to the old habits. Nation and mother calls them to carry on, because it's the behavior of the nation.

Let's see what comes up. If our team manages to complete the Gas and Energy unit we'll announce it, and then we'll invite officials from the government to be with us online. We'll start the next phase of our work.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:17).

K- Yes, good morning, good day to you. As usual, whenever and wherever you listen to the sales of Knowledge Seekers Workshops of the Keshe Foundation Spaceship Institute. We welcome you back. And as Rick said, 450 teachings on this series alone. (:18). And as we were discussing before, we past nearly 500, when you put everything else together, maybe even plus. The most important thing is not the numbers, but how much knowledge we shared, and how much knowledge we gained, and what will be the future. When you listen to this Intro, you look at the flight system, it talks about how man has achieved to whatever. And when you now know the technology, which is developed, this technology, this even recording, has become in a way, obsolete instead of aircrafts, instead of copper balloons, instead of plasma reactors.

Now we use the reactor of the man the essence of this creation, which is the soul, to commute, to transport, to in a way change the structure of the body of the man. In part of the Intro we heard, that we did a test on a December 2014 with three different parts of the world, Canada, Italy and Germany. We used a Canada and Germany as satellites. Now

just change the name, you are becoming satellites. You're registering yourself to become that step change, where the source is your soul, the energy which is within you, then being reactors rotating. A dynamic structure of the "reactor" soul, has taken place, instead of those two units.

Now we are getting inquiries from all over the world, that Knowledge Seekers (KS) want to be Satellites for the next phase of the development. (:20). You can go on the website of the Keshe Foundation (KF) and just become a Satellite, and register to it. Now, when the test comes, we all become part of this process. When the test comes, we all take shape, we take our position to bring the change.

It's interesting how as I said, if you read my books, if you read the patents, depends on your understanding, you take from it, what it comes according to your intelligence and knowledge, you have. It does not need a PhD, does not need a Master's, or being an engineer, or a doctor. We've seen one of the most beautiful people, in Keshe Foundation, have no education in science, and they are doing better than many of the others.

But the interesting point is, that the knowledge of the Creator has no patent. And this is what we teach, how you were created by the Creator, and how you can change, you can move, you can create condition of the knowledge, and the rest of it.

This week, we have entered the phase of flight test by Soul. Yesterday, we switched on the systems for the first time, and to our shock and amusement to our, and in a way, pleasure, we went back to noises, systems interacting, creating fields, energy supplies, interacting with certain reactors, and the flight room (FR) was buzzing with noise. We walked around seeing where the noise comes from. Why it's so clear. And it has a rhythm. Last night and this morning, early hours of this morning, (:22). I received a message that, it's like the systems are talking to each other. We recorded it. It's like they have the souls.

In a way they're getting ready to transport, transmute the soul and the body of the Man. It's very touching when you see how you read the patent, how you read the book. The intelligence has gone from the spaceship into the "space soul." It means the same thing if you understand it. It means the same and it works the same way. This level of knowledge cannot be patented. This is a gift from the Creator, and belongs to all of us. But how will it be used. How will be, how will be used to develop the next step for mankind? How will they act with? How do we extend it? What can we do with it, to extend, to bring a condition of peace on this planet and beyond. Not to abuse it.

We see in the past 7 to 10 days, two of the world's religious leaders have "bit the dust" (died). We see again a monarchy of religions is coming up, where we got the monarchy of the Crowns. These things will be abolished. These things will not have a room in the next few months, and weeks, once this technology expands beyond.

We see, we have to understand, what these new technologies brings us. What these new systems in Linz will bring forward to us. (:24). Talking to one of Knowledge Seekers in

the past few days. Passing an egg of a dinosaur in a museum. I was asked a question, what happened to these? Can we bring these back? Up to now we couldn't. Now we can. But we have to understand what we are going to get. Because now we know with the new technology, you will appear according to the time, position, and the place, where conditions will dictate how you will become. How you will be seen.

Today, as I've explained many times before, in our Solar System, the Sun is in the center and Earth, it's somewhere around this point. When the dinosaur existed, we were somewhere around this point. We're moving in (towards the Sun.) The gravitational pull of the Solar System is pulling the mass.

But the beauty with it is that, at this point dinosaurs were this high. In today's position, in atmospheric condition, and the condition, even the soul of animals still the same, brings a new understanding. The dinosaurs of today cannot be more than this high. (:26). Because as we go closer (to Sun), the atmospheric pressure and everything else has changed. But in essence, the soul of the animal still the same.

We will see in the new reactors, in the new flight systems, which come into operation, we can put you in one system. And you will be two meters high. We transmute you in another system in the same room. We create a condition of Planet X, whatever could be. Your height will be one meter. You'll be puzzled on your own manifestation of how come I shrunk. How come I have four arms instead of 2.

This is the reality, in which within the next few days and weeks we will be testing. This is a reality, which we have developed technologies for it, to not stay as a theory and becomes a technology. The system set up, allows us to weary the condition in the destination. But if we bring you here at one meter, and then at the same time when you arrive, we change the condition of here, to Mars. You might appear here, different height and different shape even you're still in the same system. (:28). Now, this is a reality, this is not something theory. We have the machines, we are testing it, and we will go out to endeavor to test further.

You will remember when in some of the teachings I told you, you give me a fish tank and I give you with 1 drop, a fish. I drop you in, the soul of a fish. And the fish will manifest itself in that water, as it wants.

In the Linz center, we have a fish tank. We brought a fish, nearly a year and a half ago, from the Iranian celebration table, and now it's become a big fish. We'll put this tank, in one, and we'll manifest its soul, and its condition in the other, and we show transmutation of the fish, animals, humans and the rest.

But it goes back again and I referred to this in different ways, by the say of the prophet, even a stone has a soul. Now we have a stone of egg of a dinosaur. What happens when we enlightened the soul of this stone? Would we get the dinosaur? (:30). And show the beauty of it. This is exciting time in research and development, and new understanding will come forward.

If the robe of the Christ is true, and it carries the essence of his light, with 1 thread we can manifest the soul of, and the manifestation of his physicality (P). And if it's a false robe, then we know. If the Jews have the clothing of the Moses, we shall create that through technology (T) and understanding it. So be it with the other prophets. So be it with those who committed heinous crimes, we'll bring you to answer to humanity, why they did, and we learn from it, and our children will never commit.

The new technology brings a new dimension of understanding. The new technology, as you become Satellites, we can have conferences in any corner of this planet instantaneously, when you as a soul, become the guests of the souls of the planetary system.

I received a small message this morning. Do we have a permission from Universal Community to go out? I said, I wrote, the permission was given, and that's why we are here, to get it working, to get man out. It means man will have. Man has reached the level of understanding of the position of a powerful source of energy, and life, in the universe called, (:32). the Soul of the Man (STM). It's your intelligence which extends it. And it's your intelligence which restricts it? And is your intelligence who accept the ?? dogmas to the point of its intelligence and understanding, and at that point we will ?? start.

We have started the flight system tests for transmutation from one system to another. But the interesting part for us is, how do we see the STM in the new system? How would we communicate with this soul, once arrives from its destination? For me, it's easy, I know what to do. For humans, as they are physical, they have to see something to believe it's there, they will have a problem. But the beauty of it is, we send the soul back, and the soul confirms, receiving the message, and being with us, and taking it.

Those of you who have become a registered Satellite will be contacted when the time comes, to be ready in a certain way, to make your soul accessible to receive. Be it the Souls of the Man, the Soul of the creator of other kinds of lives, and those of the Universal Community. Do not be surprised if you see new things around you, you feel new things around you. (:34). The essence of the presence is very strong.

Yesterday when we turned the system on, for the first time we felt it in the room. It was shocking. Even with the experience we have, we get surprises. To understand, that you are in the presence of the others, even though you cannot see them. You can feel them, because in our system we have created a condition of a position in the universe. And our system has become accessible to those.

It will be interesting to see in the coming time, what creatures of Creator will walk out of that room. And mankind will become familiar and be friends, new creatures of the creation. Whatever I have said, I have delivered. Be ready for this change.

The interesting thing will be, if the Austrian immigrations have visas ready for "Man from Planet Zeus." And how do we admit them into Austria? Do we create them a birth

certificate? Or do we create a birth certificate for other citizens of the universe, as they walk out of the room? Do we treat them as celebrities, or as strangers? Or do we treat them as one of us, in the level of the soul?

The reality is that mankind has entered this what I call, "zone of interaction with Universal Community, and with the Soul of himself. In the next few weeks, (:36). by introducing the secondary set of what are called, spaceship units, it will create mayhem for many of you, and will change the course for many of us.

We reckon in the next three, four weeks, if our team is good enough, for the way they are putting everything together, the new systems will take the place in flight zone. We can keep you here on a condition of the Earth, move you here to be on Mars, move you here to be in the space of another position in the universe, and bring you back to another, and return. And you will remember all of it. And you'll remember, every language in the memory, you spoke in this journey.

The beauty with the new system is, that it brings the beauty of the Creator. Our systems are set. And our systems are ready to bring the new technology forward to all of us, irrespective of our position on this planet and beyond.

In the coming weeks, we try to bring the communication with those of, who we consider as the member of Universal Community. I'll make arrangements that we can listen to the communication and the words of the "Man of Universe," what is expected of us. What we have to do to reach that ultimate goal of the opening to Universal Community. As you call it, "a message in a bottle." (:38). The message in most cases will not be heard by the ear of the man, but will be heard by the Soul of the Man, and the mankind will respond to it.

When we do this, we'll see the end up religions, and the abuse of the frock, of the name of God. We'll see the end of all what we call, religions, because every soul will be enlightened. Then we'll see the next step. Then we'll see what mankind will decide for itself to go to the next step. The technological development on this planet will not stop, because it's part of the pattern of living here.

But new technologies emerge, which bring new understanding to the work all these processes. As I said, we'll introduce new Chips, which is no dimension of tangibility. And Chinese cannot boycott it, and ??Americans cannot restrict it, but every nation, every man, will make ?? what he needs, for what is his purpose or need be. As we see, usually, they say they break a bottle, when they inaugurate a ship. This has happened yesterday, and we are inaugurating the opening of the first space reactor, which allows the STM to travel from one point to another, with the point of observation of the man.

The technology cannot be written to be patented. The technology of the Creation, (:40). has to be felt by the STM to be understood, and has no patent. Enlightenment is the patent. Enlightenment is understanding the patent of the Creation and the Creators work. We'll bring you more and more of this knowledge, and we open the door, we open the

door up the knowledge of step by step. And we'll bring this forward to the point that, most of humanity can understand, can see, and can take it up and replicate it.

It will not be belonging to a nation, to one person, or one culture, it belongs to all of us as humanity and belongs to the Universal Community. It's a gift for mankind, for him to become kind to himself, that can be a kind of a man, that can be kind to the rest of the Universal Community.

In so many ways, yesterday, pre-testing, being in the room, and then going back again, and again, and trying to understand if the systems are ready for the next step. If the systems are there, to bring the change. It brought forward, that the man has jumped, and frog leaped probably across the knowledge of the Creation, and the Creator. This leapfrog has been so huge, that the man cannot even believe itself, that it is possible.

The knowledge has to be spread in a such a rapid way, (:42). that no nation stays behind. No culture stays behind. So in the "Satellite Souls," which you are all registering to become, it's essential for us to spread this knowledge across this planet. We don't use what we call, the Satellite people, volunteers, just transmute to. We use them to transfer energy to the other souls in their language and their environment. In the way, those of you who became the Satellite, registered become Satellite, you become the Universal Council "Soul Members Support" team.

In a way, you will see the next step, which is planned for this part of the what I call, expansion of the knowledge. It's not that we send you, or we bring you things. Is that we use your soul. In a way, you become messengers of the message of the knowledge of the universe, in the language, that people in the emotion, that the people around you understand and can accept. It's not teaching anymore, by making MaGravs and showing how to make Gans. But it is the way that your soul becomes the teacher to the others, to be elevated to understanding of the teaching of the Creator, the knowledge of. It can be done in different ways. But all the purpose is to change ingrained in the Soul of the Physicality (STP) of the Man, and the physicality of the man to kill and destroy.

This way, man walk away from it and accepts in Totality, (:44). not just individuals. Those of you who volunteered to become Satellite, you have not understood what you have walked into. That you become absolute Satellites. When you have a satellite over a country, its waves covers the whole of country and every creature. It depends what you have done, that you can receive what it sends, and if it is for you to receive it. Understanding the work, these Satellites of the Soul are connected. And so we do not need to put you in the space to be. You're already spaced in the position that you are.

We want to change the mankind from the essence, from the path of killing, and war, and conflict. Then you become the ambassadors of peace. You are the Satellites of the Peace, this is your job to spread this, in a way that it changes, ingrains in the animal, to humans and the rest. The responsibility of those of you who become Satellites is chosen by your soul. And those souls have the responsibility to change the course of Humanity. This is thanks to the new knowledge. This is thanks to, for whole nations to understand to accept.

Do not be surprised, that you'll see the clergy will come to you when they take their frocks off, and they'll walk away from what they preach. As now they are enlightened to the knowledge of the creation. We expect, many, many clergy's walk away, and leave their frocks behind. That some will even hide it, because of the abuse they've done while they were wearing it. (:46). The time for this, is a handful of time, not much.

We have to see the end of two, that begins with the new cycle. And the 2 have completed, and we are waiting for the cycle, by you, to start, in how you go ahead, and how you develop the understanding. The center in Linz is a beacon of knowledge from the Creator, and you are the Satellites to receive it, and to spread it, and nothing else. Don't be so arrogant, that you become. Be humble, that you are. And this will carry on with all of us. This will carry on with many of us. And many of you who came to Linz in the past few weeks, you'll find out, that you have become already part of the Satellite system.

When you listen to the two systems, yesterday, it's literally, it's like they are in pattern of adoring each other, the noise is so intriguing. But you feel the emotion, emotion of peace, emotion of harmony and tranquility, and in a very, very specific way. This is what I came here for. You feel part of it.

We set systems to change. We set the systems to be applicable for different what we call, understandings and different souls. And we see how everyone will react. (:48). And we sit and we monitor to see how you as souls, will come to understand the Totality. And you come to understand as a whole, what will happen to us as a human race. What will be the future of us, all of us, and how we have to have a clear soul, that will not allow our own tainted desires to interact with what is to come.

In so many ways. We're preparing you for the next few weeks for one of the final steps, to become passengers of the universe. In the coming time, those of you who will test, as the passengers to the Moon and Mars, gives us the opportunity for our Knowledge Seekers to understand the process, that from then on, you will become passengers of the universe. Depends where you're been the light of your soul, that will be your home, and if you accept it to be, in that home.

In the next few weeks, as we extend the work of the Keshe Foundation in Linz, we extend the knowledge of the humanity. In a way, we become the center of spreading the knowledge through the soul, and not through the books.

Many of you will come to be enlightened, and you do not understand how it's happened. In a way you receive the knowledge without a patent, as it was said in the Intro, that Mr. Stephen Hawking cannot steal it from you, (:50). and he cannot cheat.

It's the purity of the knowledge, that you receive through the patent of the Creator, and then will you call it enlightenment. How you will handle it, is your decision. How you bring it about to share it, is your decision. It will be very interesting to see that we are still developing different aspects of the technology in the physical dimension. But you are so

advanced, that you think might not need it, but if you transmute into the matter state, you still need that knowledge to be able to do, and to be able to live.

In the coming weeks, we ask more and more of you to come to Linz. In a way, we request you to come to Linz, and go through the system, because there is a bigger plan in the background for this purpose. Bring with you, not your dogs, they are too big. Don't bring with you an elephant and others. Bring you creatures of Creator, that we, the same as we are transferring the soul of the Chinese, the English, and the rest, we transmute the soul of the what we call, animal kingdom, and the plant kingdom into this work ?? system. It's our responsibility to change everything, not just for man, It's our responsibility to elevate the Soul of the created, and not just the man, which has been created.

In the teaching of today, I have taught you a lot, if you have understood it. And there is a lot of hidden messages in this teaching of today. (:52). Those of you who understood will act upon it. Those of you who are still waiting, we'll sit till the cows come home. And by coincidence, there are no cows in the universe and they will never come home. You will be waiting for a long time, which means you have not understood the essence of the knowledge. But time will change.

As I said, when the time comes, we shall enlightened. As one of the KS, just said to me very recently, how come there was no ?? interested me. I said, because you were so ?? angry in the essence of your soul. And so, we have to understand the Totality. You have to come to understand, that the knowledge is shared accordingly. And without prejudice to whatever you do.

Transmutation of the STM is very much different, than transmutation of the physicality of the man. Essence of every cell, an the essence of every being within. The transmutation of the soul is the easy job. Where the transmutation of the physicality is within it, and it does it itself. Because it wants to guarantee its existence. In a way, as you protect and hold your hand out, or in front of you, all your head, when there is a danger, to protect that soul. Now the soul protect that physicality, that when it manifests itself, the soul itself guarantees its own existence. In a way, it's a mutual interest for the STM to protect the physicality, (:54). that when he chooses to manifest in dimension (D) of physicality, he has something to manifest yourself into, that he protects it.

But remember one point, does not matter to what shape, what combination of shapes, you'll be manifested, anywhere in the universe or on this planet. And that point, you have a soul within you, and it's your job to protect it, and it's your job not to abuse it. Just so, when you get to the water, don't drown yourself. Think that it's over, and I can do what I like when I got here. You'll find out, because now your soul has been trained to work. You will find out your physicality will be very temporary. Because now the soul has learned how to free himself from the shackles of physicality.

And then the game starts. The game of Mitra, do good, think good, and act good. Does not matter in what the state of Soul of Physicality manifested. The preacher is you, the

teacher is you. And the only person, the only entity, which can go wrong for both, will be you.

When the soul does a misconduct, that will be the end of the life of the man, as the soul will disintegrate itself, to become the food for the next cycle of Creation.

Many of you wondered, when does the soul ends. The work of the soul does not end. (:56). But if the soul picks up the habit of the physicality, you will find out there is ?? life to live for both dimensions. And then you'll find out the race is to be better in physicality, than the soul condition, and it will be better in the soul condition than physicality, and this will create a perfect creature. It's not fear of demise, it's the pleasure in a way, ascending to the levels of the closeness to the Creator.

Don't forget the same applies in the same position and condition as it does, with the Sun and the Earth, and the bigger, heavier things in the background. To be closer it goes with the Creator, the Soul of the Man, and the Unicose.

Then we understand how everything matches, how everything fits into, and you're responsible for it. We just guide you to it, you make the decision. As I said, very soon you shall see that no one will go to churches, and the mosques, and synagogues, and the temples. As the man has become wise to the freedom, the temple of the man is the STM, and actual Temple is the Unicose. Why do you choose a little what I call, bricks and mortar.

In the coming weeks, once we feel the humanity is ready for it. (:58). We'll take the cameras in for you to see the transmutation of the souls. We take cameras into the flight system for you to see the transmutation and conversion of the soul to physicality. It'll be interesting time, because it cannot be denied, what is in front of us. A new method of transmutation and transportation.

Dean keeps on telling me, "I'm ready to go in. Whenever you're ready, Mr. Keshe." Dean you have to wait till we are ready, that you can come in with your cameras, that we as a human race are ready, to see, and to accept and to bring the change. We don't want any man overboard. As everybody is onboard, and it has to be carried out the same.

I hope with the teachings of last week, this week and the coming weeks, we are preparing you for the encounter with Universal Community, and that's the whole purpose of the teachings for past couple of weeks, and the next few weeks. Understand the teaching and be prepared to encounter your fellow brothers and sisters from Universal Community, not by theory, but in reality. Because you're preparing for that point of what we call, rendezvous.

It's for you to accept, and how much shall you change? Do you want to go backwards to the UFOs to fly, or you want to go forward and travel in the dimension of the flights of the Creator. Either way there is no harm. Either way, there is no danger. Either way,

(1:00). the elevation of the STM out of the reach of the physicality have to learn is the whole purpose of all these teachings, 450 of them.

We go for a break, we come back, and we have a small video to one of our beloved Knowledge Seekers who passed away this week. The head of Keshe Foundation TV section, and then we answer any question Would you like to take us to a break?

>>> **BREAK** <<< 450 KSW (1:06).

R: Okay, here we are back again at the 450th KSW here on Thursday September 15 2022. Mr. Keshe? Are you ready to begin the second part of the program

K- Yes, if you could please play the recording which Linz means has made and has got a copy of it

Memorial video to Neil Howe (1:08).

K- (1:09:48)

Thank you very much Rick. Neil helped us a lot to teach our TV people, normal people how to take videos, (1:10). how to make things, and how to actually run a television setup, or a TV setup. Pushing us to buy systems and computers, or cameras, from Knowledge Seekers around the world, this is what they need. And that's what they need to do. And we have a lot of good memories from him.

Somebody said, "why can't you save every life." We do not need to save the physicality. It's the soul which frees, and that's the celebration of life. This is how the cycle of life is, and how the cycle of life goes.

In the teaching of last week, if you remember, we introduced new things for our Knowledge Seekers. We brought in, what we call, new dimension (D) for us as Knowledge Seekers by sharing the, what we call, a new, what we call, dimension through the Keshe Foundation work, which if you remember, were these paintings, which were set and seen. We allowed this to be brought in, and to be shared by, what we call, our Knowledge Seekers. In so many ways, we brought two sets of paintings. Both were literally sold instantaneously, and bought by the Knowledge Seekers. A third set of these has been commissioned, which is a planetary system, it's already received the reservation,

and it's more or less sold. What we've seen with the interest with the plasma paintings, all these four pieces has already been signed by me and they'll be shipped within the next day or two, whatever the shipping department does. (1:12).

We have now seen the interest allowed, and the commission we accepted, we agreed to make six new set of paintings. But instead of us choosing, you go on the Net, you put the picture, it has to be, what we call, not a face, or a building, has to be abstract. It's easier for. That a copy of it in the Gans's state can be made, and painted and sent to you. If you want to leave it to us to choose, as the next series comes up, it's available for.

Altogether, we are releasing six more set of pictures, six more paintings. Six this size, and six half this size, the six, this size, will stay the same as 3,000. The half size will be at 1,500 Euro. You can go into Keshe Foundation and book, or you decide what you want our painting to be. As long as we don't have to copy a whatever, famous artist's work. It will be done. So, this is an extension to the Keshe Foundation work. Whatever we do extra on commission, we put in extra paintings.

We encourage the painters around the world to share and send us their work, that we put out for sale. We allow the technology to expand in a new dimension. We'll see how we go from now on. So, today the third set of paintings, which is called, the "Solar System," is already been booked, and is one of our Knowledge Seekers who have booked in to be purchase. (1:14). So, we have six more to be delivered, by January of this year, we try to do it. That you can choose the paintings, does not need to be what is done. You can ask to do a scenery of the garden, or whatever, or this is what I want. It will be done by the artists. We know there are a number of artists.

We use their Gans's in their paintings, we choose the mixture of the Gans's here for the effects that we want. Paintings of the Gans's always has to be in pairs, that it creates of diversity in the field, and emotion of the field.

So, if you wanting to go to the next step, these paintings are the paintings, six of them and the commission by us. But you choose the scenery, and what you want it to be.

A lot of Knowledge Seekers asked for. They cannot register in Satellite. They can't find it. It has been repositioned as of this morning, you go into the website, in the Store, and it comes directly to it. Because it was within the Mobile system, now it's been separated into, on its own bracket.

In the next hours or next days, Keshe Foundation will have a Blueprint Day. We tried to do it today, but with the develop in the Enhancement Unit for the flight, which has the priority, it has been delayed a little bit. Maybe in next 48 hours or 24 hours, or by Monday or so, we will have a Blueprint Day, which we will show the combined Gas and Energy Generator unit.

Many Knowledge Seekers are questioning, I paid for the other generator, what happen if I want a combined one. You just pay the difference to the Foundation, (1:16). and you'll

receive it. Those of you who bought generators of one way or another, we are looking in how to bring it back, that is correctly done, that we are happy and you're happy on what's happening.

The others systems which will be introduced in the coming weeks, new technologies, new products of the use of technology will be brought out. If you are looking for the medical application of the Keshe Foundation, Keshe Foundation now operates through doctors, and on the conditions you have, we are not involved. We pass you to the doctors relevant, and where they are, and what can be and what it is. These are the Knowledge Seekers, doctors, which work with the technology of Keshe Foundation. We collaborate with them to understand the extent, and the facilities and what we can support them with.

At the moment, the doctors, it depends on what condition. We are testing on the understanding of the knowledge by our doctors, and how they will handle it, and how, what it needs to be done. The doctors are looking at the Parkinson, at the moment, and Alzheimer's, and Fibromyalgia, and others, which, if you get in touch with the Keshe Foundation, we'll put you through to the doctors. It's their job to do the job. But we don't, what we call, publicize their name, be for all sorts of reasons, that all of us know.

I hope very soon, we're waiting for the, what we call, a promise given to the Keshe Foundation. (1:18). One of the leading doctors who has used our technology for cancer, for himself. He says, when he's ready, he will do the, what we call, the paperwork. He will release the knowledge of how he himself has handled his cancer. We showed a couple of pictures of him in very recent pass. Now he informed us past few weeks that he will, when he is ready, will release the technology, the way he used the Gans technology to support himself with his cancer.

To show, as a leading scientist in one of the leading nations in the world, one of the major cities in the world, he will let us know, and how it will be done. We'll take it from there. I'm sure once he does that, his hospital will be jammed packed with Knowledge Seekers, seeking, what we call, a solution for their conditions. But this is done by the, what we call, the Knowledge Seekers, the doctors who have taken the banner of spreading the, and using the technology for its medical applications. They are practicing medicine, the doctors, and so, at the moment, if there is such conditions, we now have doctors, that we can put you in touch with, that they will decide if they take your case up, and what will be, and what they see to be done.

Are there any other questions? Or can we start with the questions?

R: So, can people write to the info@keshe.foundation as a way to find out about that? Or what would be the.

K- Yes. (1:20). We need. Let me check which one is the easiest, because this info will interfere with all our other businesses. Because a lot of things comes in there. Give me a few minutes, we'll ask the, what we call, for the IT people, which one is the best one that we can put somebody monitoring it, because it needs monitoring. Whenever it comes to

health, we get hundreds of people sending. Then they say, they didn't answer us. You've got to realize, there's a limited facilities, for limited time for these doctors.

R: .. We have Julian. Julian, would you like to go ahead?

<< Speaks in German Language>>

K- (1:22). Andreas is here. Yeah. Hi, Andreas. Can you translate this for us to English?

Q: ... He knows that in a alkaline environment no illness, or also cancer can exist.

K- Who says that? There is life even in, what you call, a cancer condition, in an alkaline state too, depending on the strength of this tissue. Generally they say, yes, if you have an alkaline. But, how come people with a high alkaline body, they still get cancer. It all depends on the strength of it, and how life is created with it.

Q: (1:24). He knows that, but hydrogen ?? (asks to repeats) It's more that hydrogen is created in alkaline areas. Oxygen is more produced in acidic areas, and hydrogen. (what was the last one ??)

K- You see, let me explain to you this. Theoretically you are correct. But, reality does not ... (he interrupts and goes on in German ...)

Q: He says that cancer has, likes it very much in acidic environment. And if you put hydrogen to it, which is already in chemotherapies, (1:26). then that supports the healing chance. (goes on ..)

K- Can I ask you a question? What is he trying to explain to us? He's trying to say, the more alkaline (you are) you don't get cancer? Am I correct?

Q: .. He says that alkaline with hydrogen, because hydrogen is the smallest particle. It goes through everything through.

K- Thank you very much. Thank you very much for sharing your knowledge.

Any other question?

Q: .. Please, can you explain more about your meaning of the physicality in reference to the body of the man? What is the difference and the relation between them? Thank you very much

K- It's the same. The physicality is what we can visualize, what we can hear, what we can physically touch. (1:28). And the body of the man is in the physical condition, you can touch it, you can see it. The interesting thing is, with what we have tested, and what we've seen in the flight systems, is that, we explained this before, but the interesting part is, we still see the physicality, bodies cocoon the energy pack. But, when we have the physicality, we can't see the Soul, the energy pack in the center. This is the interesting part.

In the new technology, in the new test we started, we're going to follow where we create that condition for the energy, is still connected to one end, but to manifests itself on the

other. It's literally like. It'll be very interesting to see the reaction of the people, when they see the manifestation of their Soul in the other system.

What do you actually are, you're in the system, in a way sitting down, and we tap into expanding the energy field within the center of you, which becomes like this. Then with the technology we developed, we take you across. Then you'll see, or you'll feel existence of another energy, and it'll be interesting. .. Then we.

The most important thing for us with the first set of people, if we reach that point is to see what they feel, because they can feel the presence of their Soul here. We know most of them cannot see it, but it's the essence of feeling, that they're in two dimensions.

Then, if we, once we've done that, we go to the level of the Soul of physicality (STP), which actually is every cell in their body. Then we transmute this into the center of this. Then when we get agreement from this side, we have to agreement from the Soul, which landed on this side, that the agreement from this side as well, that we can transmute the physicality in the same position.

Then when we've done that, now, what you're going to get is nothing here. Physically, what we're going see you is walking out here, and you will become a physical being in the dimension of the fields, which we create. But as you'll be walking into the same room, as you came in, your physicality should be the same. (1:32). Because you accept the condition of the time, and place and the position.

If I bring you out in China, bring you out in United States, bring you out in the Amazon, then we'll see if you actually look the way you came out of it, because different conditions, different culture, different understanding. It will be very, very interesting.

Then, even you will not be surprised by seeing yourself, but the voice, and the feeling is there, but the feature could be different. But there are patterns that you can hold on to the physicality, there are ways to do it, which we'll teach you in the future. So, you can still be a Chinese man in Amazon. That is another understanding of the knowledge. But this is what we call, the physicality, and the energy, or the Soul of the Physicality of the man. If you can see it, if you can touch it. Then you are part of it.

Any other questions?

Q: .. Every Monday the Brazilian community meets in a discussion group about the KF technology, after our Intention for the world peace. This week we read an excerpt from the 449KSW about Satellite Souls and soon after we transmitted the audio recording of the remote flight test and transmutation with the Soul, (1:34). done in Rick's program. Some experiences were reported. The next day a group of Knowledge Seekers concluded that during the test they had different experiences, but with similar conclusions. The experiences brought up very strong internal emotional issues, because they felt that the physicality interfered a lot in the process.

Besides this, they all felt physical symptoms such as heavy head, crying, sore thymus, and tiredness. So, the question is, why did these similar emotions and physical symptoms occur with these people from our group? What kind of connection did these souls established to feel the impact?

K- We see the same emotions with many of the Knowledge Seekers, which go in the (flight) system. It's interesting what you are reporting, that means we have actually transmuted even by recording the emotion of the, what we call, the effect of the system.

We see many people, man or a woman, irrelevant, the age is irrelevant, come out, and they tell us that they were crying. We've seen one or two crying, they tell you, they show you the tears coming down their face, they say. But we don't see any tears in some of them. A lot of them speak about the tiredness, pressure in the back of the head, and a lot of emotional interactions.

So, what you tell us, what you've done, it shows we don't need to be (in the FS). (1:36). By recordings, we can spread the knowledge. But if you get the same effect, as what you say, many of you feel the same. This is, that was tested to see if we can send the emotion forward. You're the first group as a recording telling us, actually, I think another group telling us something. But, that even the recordings gives you the same emotion.

We did not, as I explained, I set the system up to be transferring. .. That's how we went into the Rick's teaching that day. We set out. We set the system out to transfer that knowledge in that way, and to test it. In the coming time, we'll do other tests with the Knowledge Seekers in different, what we call, teachings. Because it's important for us to see. When we go to Rick's, because people from all over the world, in his program. When we go to the Brazilian, what would be the effect of our system in Brazilian community, and how would be the effect of the same system with the Italians, or the Germans, or the others. This is part of the tests I'm setting up. Because we have to bring balance between all the, what you call, understanding of the languages and cultures.

We set out in Rick's program deliberately to create and see the effects. A few people reported it, what happened to them or whatever. But it's nice to see that the recordings still create the same effect. (1:38). What you tell us is the same, because the tiredness, the exhaustion comes in physicality trying to handle the expansion of the Soul. That's all it is. You use energies to allow the expansion.

In a way, you subside a lot of energies. That's why when you go to sleep you're so tired, the whole body stops. Because it goes using the energy to repair, to be ready for the next cycle of abuse of the body in the dimension of physicality. So we understand why you feel tired, you feel exhausted. Because you use a lot of energies to tame this animal, which is the physicality of the man, to allow the Soul to expand, needs the sleep time, needs a lot of energy to be diverted, that it weakens the, what we call it, the shackles of his prison. So it's, most of the people that come out they say that they are tired.

We tested this even yesterday. We have a facilities in our systems. We had a very peaceful team, group of people the past two weeks, and it was interesting. We know it by running the system. Yesterday, it was very interesting because I had one couple, and there's a very big problem between this couple, huge problem. And we are aware of it. They are part of the, they have been with us three or four times. I wanted to know exactly what's going on between this couple. (1:40).

For the first time after two, or three weeks, we saw the system comes to a halt. Which means, they are taking so much, they are pressurizing so much the system, the system cannot run. It just comes to a halt. It's just " " ?? there. Then it starts again.

It depends, if you watch, which of the couple moves, physically moves. That changes the break, and the system carries on. Then it breaks (again), and carries on. These are the energies, which one uses into controlling the physicality. So, when you see these kinds of, what we call, tiredness and the rest, it's well understood. Because you're using energy. That just doesn't happen, the feeling I had, or I felt something, or we all did whatever. To get to that point, the information was sent to create that connection and conditions.

This is what we going do with Satellite people. With Satellite people when we send the message of peace, received by the Soul. Now that Soul has to translate it to make the physicality peaceful.

I did this last week with the same couple. I asked them, and I told them, I want to understand your relationship when you come back next time. I asked them yesterday, (1:42). how is your relationship between each other since last time. Interesting enough. Interesting enough, the wife immediately said, it's wonderful, it's changed. It has changed greatly, she said, and it's beautiful. So, we allow the two to understand, to share, to interact.

Because what we did in the first set, I allowed them to sit in different systems, they had no interaction. In the yesterday's trial, we set them, once the man to be the captain, the woman sits in the back, and once the woman to be in the front, and the man to sit in the back. It came very clear in the system, that the problem sits with the woman. The problem in the relationship comes 100%, the way we set the system up, comes from the female part. Interesting enough, when the man was the captain the system ran smoothly. When she became the captain, the system stopped. She was putting so much pressure, I'm in charge now, I'm the captain, that our system was showing.

It's very much, I've done a lot of these tests over the years, if you go back if, you remember, when I put the Knowledge Seekers in the Inzano in front of the dynamic systems. I knew the guy who was sitting in there was planning my murder. I asked him, and I saw the operation, (1:44). the lie that he was telling me, it was there. So, and it's the guy who tried to put, actually poisoned me to kill. I knew he was there, and strangely enough he was a Belgian.

We see the behavior, and our systems are tuned into these things. This is why we put you in chair one, two and three, to elevate the physicality, to elevate the Soul of the Physicality, that they can work in harmony with the Soul. We've seen this system, and now with this one you tell us, it shows it can be transmuted, or transferred to other dimensions and other people.

It confirms a lot of other things which we wanted to design to plan, to do. It just brings us more information to vary it in a different way, to learn more. But I've seen, because I see people coming out, especially women, they say, "oh, I was, tears were coming from my eyes." But the beauty of it is, there was not tear, because they wear makeup, if it was tear we could see the line of tear. And I don't say anything. A lot of ladies wear different kinds of makeup's, and they say, oh, they were crying within the system. It shows that they're in dimension of the emotion, dimension of Soul, encapsulating the physicality. It's like when you cry in the dream, when you wake up there is no tears on your face.

A lot of knowledge is gained through this, how physicality behaves, when the Soul is. When they say this, we know, because we see the steps. The people who are in the dimension of physicality, they cannot go into the dimension of the Soul. (1:46). When they cry, I usually give them a tissue, I understand they haven't reach that point. But those who come, and they explain to us how they've been crying in the system. You see there is no tear. It's exactly like a dream. So, the Soul has been operating in what they've witnessed in dimension of emotion.

Any other question?

Q: .. My question is about a relationship that I thought between the transmutation that you explained that needs to be done in stages, between the physicality, the Soul of the Physicality, and the Soul of the Man, and our Creation in the womb of our mothers, but in reverse, being created first, the Soul of the Man, the Soul of the Physicality, and the physicality. But the question is, we wait nine months to be born. Why is the transmutation process, why it can be done in seconds?

K- The transmutation, the way you see in a physical dimension with the present life of man is through the dimension of physicality, not through dimension of the Soul. Children of Mitra would have that possibility. But still, they have to mature the Soul. And that maturity of Soul needs a time of dimension of accepting the physicality.

In the Space man will not wait nine months to give birth. Once you create the dimension of the Soul. (1:48). It could be a millisecond in another dimension, what is nine months to you here. We are preparing man for what is to come. Not what is here today. The child of Mitra is amongst us. This new cycle of life, we'll know how to handle the Universal Community, and how to mutate. Because the Soul has been created, not the physicality first.

So, what you consider as nine months here, it will be seconds in the other positions in the universe. Our physical Soul cannot handle it. But the two being born through the Soul of

the, what do you call it, the two Souls can handle the mutation to come. Because it always takes priority to the Soul, not to the physicality.

It's what we have to learn, it's like when you go to another country, you learn the way of living. This is the way of Creation. We learn it very, very quickly and he has started the cycle ?? We are part of it. The new cycle in the life of the man lives the cycle of man, but generating in the dimension of the Soul. When it goes to another dimension, you know, it's like when you go to another country and you already learned, let's say you go from America to China, you already learned Chinese, and the culture, what to do. When you arrive in China, you know what has to be done. (1:50). But if you're not, we haven't been taught, then you have to learn, or just try to find a translator, and their behavior and the understanding of it. It's how we see, but we don't understand. But, as I said, just because you speak it does not mean you understand it.

There's a beautiful video on it, as I said before, it's a German Minister or high ranking officials come to China, and they are given the menu to choose the food they want. And traditionally, in China, you sit around the round table with a rotating table in the middle, and all the food is put on the middle table, and everybody eats what the other people have chosen. So, you have a variety of tastes. When the food comes, the Germans just take the plate they ordered, they put it in front of them, and they start eating, and the Chinese look at them and says, hey, what's going on? You don't know the culture, just because you can hold maybe chopsticks. It's the way it is, we have to, not just see the way ?? we go, but you have to understand the culture, what it is, what it means to share. Not like our educated ministers, grab the plate I ordered, as we do in Europe.

So, it's how .. the new generation of the, what I call, the Soul of the Man knows how to behave in the universe. It's a big difference between the physicality, and the Soul of the Physicality, and how they will interact.

Any other question? (1:52).

Q: .. Well, our knowledge seekers are asking, we have a team before to make the subtitles for the for the teaching. But we didn't get that things like since 240 KSW. So it's that team are still working on this?

K- You're the Chinese people. Are they still working? Where are those people? I think you've got to answer that question, not me.

Q: I know before there was a transcriber team, is that team still there? Because I have been in one of them. But later on, because too much of other work, and I didn't continue to do the transcriptions ...

K- I don't know, you've got to find the answer.

Very soon Keshe Foundation will make a lot of changes in the operation of the Keshe Foundation translations and transcribing, we are working on it, but just give us time, that every. This is a huge amount of information, that needs to be transcribed, and translated, and correctly. In the near future we will make some announcement about this thing. It's all languages, it's not. It's like, in a few weeks time, you will see the Store to Keshe

Foundation will change totally. The IT team are working in the background with it. Now they're going to shoot me, saying why are you going out with it. But it's the process that you get, I think 17 - 18 languages. Now there is, when you go on the Keshe Foundation website, the language whatever you want to order, everything will be in a, what do you call it, (1:54). the majority of spoken languages around the world. We should be able to do everything else with Zoom and transcribing.

But again, it has to be corrected, because the voices are misread and mis-done. I know the English transcription is going still on by a couple of people around the world. They're still transcribing it, and it is done automatically in Switzerland. I know, and it's all up to date, day by day. But about the other languages, Keshe Foundation has to look at whatever it is.

It's just like the books. We have books translation in so many languages, it's just that we need to set up a team, that actually set the book the way is the original books, and everything is done the same. This thing takes time, and then there's a lot of financial backing to be there.

Any other question?

Q: .. In the vertical beings, what is the relationship between xylem and phloem fluids with plasma and Gans? Do you want to know what they are?

K- Yeah.

R: Let's look at our friend Mr. Wikipedia. I kind of anticipated this. There's a nice picture that we can have a look at here.

It says, xylem is one of the two types of transport tissue in vascular plants, the other being the phloem. The basic function of the xylem is to transport water from the roots to the stems and leaves, (1:56). but it also transports nutrients. Then the phloem transports the soluble organic compounds made during photosynthesis, known as photosynthates, in particular the sugar sucrose to the rest of the plant. And says, this transport process is called, translocation, here's a nice word for you. And if we look at the picture, you can see the blue is the xylem tissues that allow the flow upward into the plant. And the phloem is the tissues that allow the sugars to flow back to the roots and up into the flowers and so on. From the leaves.

K- It looks like a blood circulation, doesn't it? And it looks like the lymph circulation. But, the point is, you've got to look at when you ask (what it has to do) with the Gans's. The minute, I always say, you have a banana, up to your lips it's a banana, as a matter state. Once you enter your mouth, it's in the Gans state, because the dynamic Gans of your body creates an environment of a Gans, magnetic field. It's the same with the plants.

The minute the material, a gas enters, or energy enters, the dynamic of the structure, it's in a Gans state. There's no difference. Then they have to find like a gravity and M, what goes where, and how is needed, what is needed where. (1:58). So, it's a Gans state. It's like your blood and lymph, it's in a Gans state.

In what has, and what is needed according to the, what you call it, the structure of the plant, or the tree. There's no difference, they are in the Gans state, straight away. From the minute the energy enters and converts into a physical thing, it is in the Gans state. There's no difference between a leaf and a finger of the man. Plants have many fingers. That's all it is. Our body absorbs energy, so does the leaf, absorbs energy. Then the minute that energy is absorbed, (it) becomes part of the structure of the body and start circulating as a Gans.

Any other question?

Q: Afar ... If you go out, imagine you go out and sit outside on a patch of glass, some fleas and maybe some people around. And when you look at the glass, you can see imperfections, you can get little tweaks there, maybe a little bit of dry patches. So, it's not perfect. I mean, look at the trees, it's the same thing that you see. They're not all perfect. When their Soul comes out, then suddenly everything, (2:00). the glass, the trees, they change, that you don't see the dry patch, everything just beautifully, as if somebody painted them. Like, everything is perfect. Even when you look at people, you can just see any imperfection, just the beauty of it become, like, say a thousand more. Why is that? Why is it so different?

K- I don't know, you've been there, you've seen it, you've got to be able to explain it. You described it so beautifully. So, you've seen it, you tell us how and why.

Q: Because you can see, you can see inside the leaf, you can actually be on top of the leaf. And you can actually, when you get to that point, you can just, I can sit on top of the leaf for thousand years and just see the beauty of it, I don't want to come down. Like the cloud just come to you. You don't have to go to the cloud, the cloud comes to you. Just as if it's just talking to you, I just, you see so much beauty that I don't want to even be in physicality. Because even nothing really matters. It's just magnificent. I mean, you can see the little tiny things in the leaf that, as if you can see the rain in the trees, everything. Then when the breeze touches the tree, the Sun goes towards, it's just like, you just can, just, as I said, you can sit there for thousand years and you don't want to get up. But when you come back to physicality, all the imperfection comes back, all the judgment come back, (2:02) everything totally changes.

K- That's nice. If you can see, then you can explain it so nicely. I hope our other Knowledge Seekers reach that point to do, and to be able to see.

Q: Actually when you, even when you come back to your physicality, if just close your eyes, there is something within you that just moves. It's different, like, as if somebody else ?? is in you, it's not you, and ?? giving you so much peace and comfort, that you just can sit there, you don't even get up to do anything, you can just sit. That life is, just is, it just is. I don't know how to explain it. You just can sit and just be.

K- I can't say anything, because you do it, and you've been there. So, it's nice to explain to us. Thank you very much.

Any other question?

Q: Is there a connection between empathy and the development of a Soul?

K- What do you call empathy, in English language? .. (2:04).

R: The ability to understand and share the feelings of another.

K- Now, what was the question?

Q: Is there a connection between empathy and the development of a Soul?

K- Of course. How much you can accept, and how much you can develop what you accepted? We see things, we see, we use tools. But very few of us, picks that tool and adds something from our intellect to change the use of it, or make it easier to use. Millions of people use the same tool, but they never think about doing something with it. Once a person understands it, and the pleasure of it, he or she adds something to it, or take something away, and changes the purpose, or creates an easier way of doing what you're doing. It's the same.

If you understand the emotion of it, and understand the knowledge of the emotion, you can do anything with it. All are connected, because one leads to development of something else, one leads to conclusion of something else. I am a, part being an engineer, a gadget man. I love gadgets. I look for gadgets which very little changes in them, makes their use easier, or brings a new dimension to it. It brings different values to it, what it can do. (2:06). Then it brings a different pleasure. The same tool it brings, gives so much, and you keep on using it, because, then you say, "oh, the man who thought of this, or just this little thing, has changed so much.

It's the same, a lot of us used it, never changes, when one person evaluates, understand it, bring, add his emotion and knowledge to it, and changes it, for others to enjoy it. And elevates his own understanding, maybe he comes up with another change again, with something else. It's directly connected.

Any other question?

Q: Can take crystals with you to Linz?

K- No, we don't allow you to bring crystals with you to Linz. Don't bring crystals.

R: No crystals. Okay. That's sort of like having cell phones and stuff like that, I suppose.

K- Yeah. No mud crystals, no, none of these games.

R: What about jewelry such as rings, diamond?

K- We allow it, we don't stop it. But when you talk about crystals they come in with a different idea of it. ?? But nowadays, we just as we extend the, what you call it, the development, we are less and less restricted by other things. It will come very soon, when we let you in come with a handbag and suitcase, because when you land in Europe, you'll need it. We'll have to see. (2:08).

Q: .. Chris in the chat here says, he wants to participate freely at the Satellite program. And you mentioned something last week about that, he says.

K- Yeah, listen to the last week's broadcast. We have a lot of people want to do freely, a lot of things, and cause a lot of problems for the Foundation. We've become wise to this, "freely jobs." We see it.

The whole process is to understand why we are doing it, and what we are committing ourselves to. There are a lot of, what I call, misguided people around, and our openness became the cause of our pain. So, we closed many, many, many, many, many, many doors. A few years ago, we used to have, what we had last week with Joel, with sharing the knowledge with the vineyard. People used to come with what they did, and we found out, that was a pathway to abuse other Knowledge Seekers, because they were in Keshe Foundation, they showed something, now they became ?? something and started abusing other Knowledge Seekers, and all sorts of problem. So, we stopped that.

They use us for abusing other Knowledge Seekers and all sort of things. So, we learn. It's you who teach us what to do. Even some of you are very sincere with what you want to do, but those who abused us, and abuse the system taught us how to block the system. We used to share a lot of knowledge in all aspects. Then we found out, some of them were fake, some of them were there for personal gain, and some of them gradually became a big headache. (2:10).

So, we are very far in between Knowledge Seekers we know works, we know it's been taken with our collaboration, and we know what's the intention we support them. Now I even see that in some of the chats, how some of the Knowledge Seekers abuses his freedom and splash what they want to do, or what they're promoting just because it's in the Keshe Foundation. We learn from your conduct. It's just not you, as a general, Knowledge Seekers in general.

Q: Mehranez ... In your opinion, your idea, do other living humanoids or other living entities in the universe, of what you know, have the same panoply, the same variety of emotions, (2:12). or, what we call, noble emotions like empathy, as human beings, the poor human beings in Planet Earth?

K- Emotion is part of the characteristics of creation. When you have fields, at a given strength and mono, they somewhere eventually step down in the strength, or they get absorbed into a higher strength. In one point or another they slow down to manifest themselves in dimension of physicality. In that process, from the start to that point, somewhere down the line, it creates a strength that it shows, or manifests itself as an emotion. It depends how we call it. You call it empathy, you call it love, you call it fear, whatever.

Even in the dimension of the galaxies, we see emotion of the galaxy. If you look into it, how it behaves, how it's created, how he explodes, how we see. We see solar systems, we see galaxies hitting each other, we see galaxies exploding in the universe. It's like you get a brain hemorrhage, you get an explosion, and why, what cause, what pressure, what is stress, what emotion was on that. Emotion is not exclusivity of man.

In the coming time, when our scientists become wise enough, you will see emotion of, we can register emotion of the fields of the galaxies. (2:14). I see a lot of pictures by NASA, and other places and they say, two galaxies are heading to collide, or to whatever. Watch the space, would they? Would the emotion of the galaxies allow them? Or like when you run to somebody, you just skip around it, it would happen. Sometimes you'll hit other guy, but sometimes we get around it, because the emotion is not to hurt. Emotion is not exclusivity man. Even though we would like to think it is.

Q: Yes. I mean, like this kind of sacrificing the life for the good of others without anything in exchange. Can you talk about ??

K- Always, it always happens. Actually it's more prevalent in the Universal Community. On Earth, it's very, very rare. ... It's very rare.

Q: Just for service?

K- It's part of allowing the others to exist, it's not service. Allowing to, for putting others existence ahead of yours. Because what you give, allows you to become part of, to become a bigger picture of a structure.

Q: I'm sorry, I just have to make an example of these days, I'm sorry. It's just like, these days they are having memories of the ?? Hasein. And millions of people, (2:16). maybe 5 million are going barefoot, without any food with them, to go to that place he was sacrificed. Because they know they are provided. And those people who serve them, clean their hair, feet or give freely, they are so much pleased, that they accept what they give, because they come from their home, their cities, and they go to another country without any future, knowing what is expected.

K- You have to explain, you have to explain for people to understand. This is in the Shia Islamic culture. It's part of the grandson of Muhammad, blessed his name, in the battles with, what we call, the uncles, and the cousins of the Muhammad, who were power struggles, between the two sides of the family. The Son in law, and the grandchildren of Muhammad, blessed his name, in the battles, they lost their life. The Shia's see it as a sacrifice. The Sunnis look at it as the end of an era of enforcement. Depends which side of the fence you sit. But the Shia's is, try to replicate the sacrifice the grandchildren of Muhammad, blessed his name, did, to keep the word of Muhammad flowing.

And most of this happened, as you say, around Cavalla ??, which is the Iraq of today. In that process is where the, what we call, (2:18). the kingdom of Iran got mixed up in the religious points of the Islamic division, which led to the Creation of Shia sect, which now we see coming down the line. And now we have another bunch of fakes, creation of it, which they call themselves all sorts of names, has been enforced in the Iranian culture by others, and now it's become part of the culture of Iran.

So a lot of Iranians do. Shia is not Iranians, Shia is a believer in the path of leadership by the daughter, actually by the son-in-law of Muhammad, do this walking, they see as a sacrifice, that they do it, that they feel how they felt. But it's the same thing with a lot of, what you call it, Christians do, in southern, northern Spain and, what you call, southern

France, walking this path, it's cultural ?? religions, and belief's ?? is done. And the people see it as an achievement, or for satisfaction of the Soul.

Q: Well, at least it's for a good cause, because it creates a service people, serving others.

K- In a way, yes.

Q: In a way, it ends up with this feeling of love and brotherhood, and also the. So, why did God prefer man to the angels? Because he said, he knows the things you don't know. Why, according to the book? (2:20).

K- Maybe the answer is what you are spending time with. Why did the God created man to the angels? Now you see the beauty with the man, which has been given the knowledge of the Creation in the universe, the ??, God knew what He was doing.

Q: I know, I feel like ..

K- One day mankind will understand what gift has been given with the knowledge, which is dispersed amongst man nowadays.

Q: Thank you, I really come to, to really finding this greatness of man in the potentiality, and the capacity to have peace, provide peace, and be good. Good means the values are more higher than what we thought he's capable of. I really feel it, feel like that because...

K- We, it does not really do it ??. We have a lady who is doing beyond imagination things. She is not a Knowledge Seeker, she has been touched by the knowledge. And she is doing things beyond imagination, that the Knowledge Seekers will not even dream to do. And I wrote to her this morning, that one day mankind will come to understand the gravity of the work you've done for humanity. What she has done is beyond the imagination. She's not a Knowledge Seeker. But she understands what this technology with her help, (2:22). can do, and the change it can bring.

She's in a position of the power to bring that change, and she has put all her life to it, 24 hours a day to bring that change. The first time she walked through the Linz Exhibition Center, she said, this is what we've been waiting for. She's extremely, in a position who can bring that change, and she has put her life in past months, just to make sure that change comes.

These are, what we call, bless her soul. That's why or, what you call it, angels, but they are humans. And they are doing things that no Knowledge Seekers will do. None of our Knowledge Seekers will do what this lady with an extremely powerful position, internationally, is doing for the Keshe Foundation. She doesn't ask for anything. She doesn't want anything. She just says, I can see this will bring the peace, and I'm in a position, who can bring a condition for to do that.

We have very powerful allies around the Keshe Foundation, in government's in high places ??. They know what the change is and what the change will bring, and they know what will effect us as a human race, ?? do their actions.

Q: Just because, when we. In my personal prayer prayers, I pray, I finish with praying for the whole universe. Is it better to do that, or to pray for all the good in the ?? ? (2:24).

K- Your Soul decides, not man. If it is that maybe you have such a big soul, that the universe can benefit by it, with what you give. There is no, the time of somebody approving and disapproving is gone. It's you who have to understand it. There is no priesthood if it's correct what I'm doing. You have to judge

Q: .. While trying to share plasma knowledge, I do it by trying to be a good example of health, morality and conduct. Some people are curious and ask for knowledge. I tried to adapt answers as good as possible. I try not to intervene on people's life. What is the best approach when they blame me for various things that happens in their life?

K- Let it be. They'll blame you for it anyway, good or bad. So, you carry on the way you do. They blame you for anything. It depends what they say, they are members of the party of "wind," depends which way the wind blows.

R: Well, you gave me some really good advice with that. It's like dealing with trolls, basically. When people are, they troll you on. They say they want to know about the plasma knowledge, (2:26). and then they blame you for telling them, telling you about it. But you gave me two words, you told me two words, how to deal with trolls. And you could say the same thing for those people that blame you for things. The two words were, "ignore them." And it was really hard for me to do that initially. Because you know, trolls and people that blame you and all that, that blaming game can get very involved, you get involved in the blaming, or taking the blame, or trolling, and trying to control the trolls, and rationalize with the trolls. This kind of thing. When it just takes, it sucks your energy and your time, basically.

K- You do something else better.

R: Sometimes, just to ignore them is the best advice, even though, it's actually hard to do if you're used to getting involved in at all.

K- Let me explain to you something very interesting. You know, we carry close protection officers with us all the time, most of the time nowadays. A very strange thing happened very recently. That they are trained to react, even through they are in your near proximity. This gentleman sees another gentleman on the other side of the window. His immediate reaction was to react. He gets out and chases the guy, the guy runs for his life. Even they knew each other. (2:28). Then the guy manages to get where he wanted to get to, to save himself, in a way.

And I asked him a question, why do you do this? He said, my instinct is to protect, when I stand someone, and see another face behind a window, which is not supposed to be there, to me, ignites the condition of danger, and my job is to protect you. If this happens, I have to go. I don't think, it's just automatically kicks in. The only thing is, they knew each other. The only difference was the guy on the other side of the window shaved his

beard after so long, he didn't recognize him. They always talk to each other, every day, just without the beard. For the first time he did not recognize him.

This brought to me the instinct of response. I said to him, this is not the way to be, you've got to analyze, see what is there. He said, there's no time to analyze, for me to analyze is your life, so I have to react. I said to him, you've got to be passive. See what's next. He said, there is no time for, I'm not trained that way.

So, we get used to reacting, we are conditioned to reacting. This is becoming part of us, and trying to change it is impossibility for some of us. This experience has brought me a lot of things how people react, how people see things. They have to react. It's very hard to walk away and not to react. (2:30).

It's the same with what Rick says, just ignore it. To ignore it is harder than actually dealing with it. Because dealing, you put your emotions out. This is how we have become, we react. Very pro active, then to react. We are ready before even anything happens. Then this is very, very strange, the way we've been brought up to become passive than reactive, or pre-active. and it works.

I was clicked to be proactive, because that way they keep you on the edge and then they use it against you. In the past 2 -3 years I learned to just to let it be, what it is, it is. Then it will come to itself, it was their own way, to serve you the wrong way. They count on your reactive, and it just gives them that satisfaction, I can do this, I can do that. But trying to not react is very hard. It becomes your habit to react. We learned a lot. It's just to know, just let it go. It is time for them to find another way to try to get reaction from you. So, while they're busy doing that, you carry on doing your work.

Q: Yes. And what I was going to ask, tell this person is this, my experience tells me. When originally, when I started to learn the knowledge, not only plasma knowledge and all the knowledge of Creation, even in the past, the way human operates. (2:32). Because we come from the point, at least I came from the point, "I know it all." So, when a person is talking about a problem, I deliver the knowledge in a way, that I'm kind of like acting like a boss, it doesn't come from humbleness.

So, when you start to understand the Soul, and when people start to talk, when you come imagine you're God, when you look at God Himself, or the Creator, He's always shining like a Sun, He doesn't care if you're poor or rich. Or if you have a big ego, not ego, anything, He just shines constantly. So, when you think about yourself, like a God, like a Creator, you actually become like that, you will shine.

So, when you look at yourself, I am shining this person, and just listen to this person, when you start listening, not to want to constantly give them the solution. First of all, you understand two things. One is, is this person actually got this problem, because he constantly talks about his story and really doesn't want to have a solution? Or does he really want to have like to have a solution? When some people come and talk now, the way I look at it, I see it, I see this person doesn't want to have solution, but he wants to

constantly say, look at me, I have this problem, because they get attention. So, for me to give them solution ??, they kind of are going to attack you. But then when you understand it, where this come from, then you approach it differently. Sometimes you just listen and say what they want to say, or sometimes you understand this person really looking for a solution.

So, in understanding, I mean looking at the Soul, when you look into the eyes, you can really see through them. (2:34). If this person really want to have solution, because also you come from below, you don't come from above. You become like so much like, as if you bow into them, in front of them, and the body bow to them just being present for them. And that way, the whole transition, the whole interaction between the Soul goes smoothly. Either you go to the position that you offer them help, and they accept it. Or you know, this person is not ready, and they're not going to get help, but at the same time we never listen, because your Soul is shining like God. Although you didn't give any solution, you change them. When you see them next time you will see the change, because the minute we go from arrogant, and I want to give solution. Because most of us come from the point of arrogance, I mean, 99% of us it comes from that point. Although we are Knowledge Seekers, but that knowledge become a weapon to say, look, I know but you don't know. You have to listen to me, I know it all. So, when you do say that and you just there as a being, your light is shining. So, either you want it or you don't want it, you already affect them.

K- Yeah, it's the way. .. When we go into teachings we are always Knowledge Seekers, all of us. Nobody goes in as a teacher, even in many of the teachings. I see our teachers are always Knowledge Seekers. It's understanding, that we don't know everything, and that's the pattern of life. As Rick's says, I always go, whenever the meetings are, I always, I am a Knowledge Seekers. (2:36). I'm there to understand. The minute you become a, what you call it.

So many people asked us, can I teach, and we used to allow them to teach in one hour, two hours in different parts of the Keshe Foundation teaching. Then they called themselves professor at Keshe Foundation Spaceship Institute and, what you call it, all titles gave to themselves. That's when they lose it. That's where everything falls apart. So, it's understanding, that at any point we are there to learn. And we always learn, one way or another, something new.

Any other questions?

Q: .. << Speaks in Portuguese Language>> (2:38).

.. Could you speak a little bit more, Mr. Keshe, about the negotiations with Europe countries regarding the delivery of the generators and gas units. Also he is adding that he is always very anxious for Thursday to come, to listen to your teachings, and thank you very much.

K- ... As I was saying, .. there are a number of European nations who are looking at and working. There is one of the leading European nations, they are pushing us, they want to see a system, a working system, that it can be changed.

As I said, I was talking to one of our team this morning that, with them we are getting pressurized, that they want to see a working system. The reason I explained earlier on the about, that we're going to put a Blueprint of the Gas and Energy unit, is in response to, not a pressure, but the request by one of the world leading Western European nations in respect to this technology, (2:40). to see how we can comply with it, how we can bring it out. But, this showing of the gas production, energy production unit this coming days is in response to our work with one of the governments. They want to, it has to be shown, it has to be shown working, and then how it can be adopted rapidly.

People who don't live in Europe don't understand or cannot comprehend what is cooking up here. We have prime ministers, ministers, leading industrialists, talking about the massive problems, recessions, and lack of the gas, and energy, and the prices which has gone up, budgets which puts into act to protect it. In a way, they're trying to keep the government's and, what you call it, everything under control. 130 billion budget by the British government, and billions of budgets and schemes by other governments trying to reduce the pressures. Yesterday, we heard that EU is heading in, what you call it, capping on the profit the oil companies and gas companies can make, then 33% taxation on them that they can share their income with the others and the public. This has become a reality. So, governments try to find a way.

And the best way to do it, the way I explained to one of these politicians very recently is, the way you build a house nowadays, and it has to have a standard, this, and that. (2:42). These gas production energy, electricity production units, hopefully, when it comes, and understands by the community, has to be part of the construction of the buildings, that every building provides the electricity and the gas, and you have it. It's just like you have a central heating, these units have to be as part of the building. This way, the pressure, the responsibility is passed on to the house owners and the builders, than government being responsible for it.

These are the things which is inevitable. It's going to happen when technologies like this emerge. When you don't need to produce gas and pipe it down the line, and you can produce it at home, then they tax you on the house, what you do. They have to find a way to get their money to get the services. But if they don't provide it, and you do it, they're just like a television license, you pay a fee a year to the government.

It's not just Keshe Foundation technology. We see this coming up. Very, very soon governments will wash their hands of the responsibility of providing energy, because it's too cumbersome and it involves too much. Technologies like us and others will force this positions. It's just a matter of time.

Now with the situation we see, what you call it, the spread of energy, and how it will happen. Very strange things are happening in Russian oil and gas pipes, and leaders. We

see many, many Russian, top Russian oil and gas people accidentally falling out of the window of the hospitals, getting thrown, or their children murdered. (2:44). There is a lot of realities which we don't know. Who sits with who, and how much of this pressure is real. But some people are making money out of it.

European countries at the moment are on the edge of it, because it's hyped up, people are paying the bills. It's not hyped up, we are paying the bills, we see the electricity, gas bills. People don't travel, because the fuel cost is so high. We see it generally, but situation is, what you call it, diabolical, and the way it comes, and how much it will be pushed, to what limits, to how much, we'll come to understand soon.

K- We hope so, thank you very much. It will be announced very soon. Short notice, the blueprint of the new hybrid system. You'll see, and it'll be in public. It's the first time such a system has been produced.

Q: Will this Blueprint day happen before next Thursday?

K- It all depends. We were hoping to do it today, as our team was so much pressurized with so many other things. (2:46). So, we hopefully to do it as fast as we can. It is not easy, it's, what you call it, it's time consuming, you have to get everything right, the way it is. We have an idea of how we're going to demonstrate it, how it's going to be presented. In a way, you will see it, more or less, how the end product will show itself.

We have a clear idea how we're going to show the system, two systems being fed by one system ?? . Hopefully in a short time, much faster, in the following weeks, we will show a plasma power generator, a true plasma power generator. We have a guy working on it to be done, which doesn't need a conversion.

Q: Can we have 24 hours notice?

R: I was going answer no, just simply no. ..

K- It's just that we share the knowledge the way it comes, and this is crucial to be done. The spread.

There are another pressure on us regarding the new Corona, spread of the new version of Corona. How, if we can release the package for it, we done when we see it's necessary. But, what we heard Chinese are closing different parts of the Chinese mainland, due to the new Corona. We just got to see if it actually takes hold as it was expected. Or we're going see another autumn of lockdowns and everything else. (2:48). But we keep silent at the moment with it. But, it's moving in China. We heard districts are getting closed seven days, 14 days, and the rest of it.

I received a comment, would you like to make any comments about what has happened in the past week in UK? We have no comments. And the same, I'm receiving requests, can you explain what's happening in Iran? We have no comments. We wait for the destiny to show its time.

Any other question?

Q: Dean .. I think you've just answered all the questions I had. So, thank you very much for that. So...

K- What was the question that you were thinking to ask?

Q: .. I was going to ask you about the general situation with the technology coming out in the world governments, and obviously this is linked into the gas, the energy supplies, and the whole release of the technology. There's one key issue, one vital little plasma that just needs to connect to open the whole of it up, to the whole of humanity. So, but I think these, these chess pieces are being played independently and in totality, and I'm sure you're aware of the whole totality of the situation.

K- We hear a lot. We don't get involved. But the best way is just to carry on what we are doing. (2:50). The development of gas units, the development of the new transportation and transmutation system. When we master it in a good way, our team understands how it's done, then most probably it will be released internationally. That's the only way it can be done. Once we receive our securities, the way we are working for next time to come.

Keshe Foundation will most probably release a lot of new technologies in one go, and we go for it in one go. Because we are, what you call it, we are, more or less, an NGO. Once we have the securities for the long term steps of the Foundation, like the way we opened the patents, this time we open the other things.

We will rule . As I said in the last week's teaching, we're just waiting for a piece, few pieces to come together and completes it. Then we are ready to make that move to bring the change.

Q: ... You said you didn't want to comment on something just now. So, let's take it to another position. Let's talk about it in various souls are repositioning and taking new dimensions, whether they are from, in society, in a position to believe to be a certain height, or and many people that are common, and very beautiful Knowledge Seekers.

K- Can I be very precise? What I say, stop being Englishman, speak straight.

Q: Okay, so are we talking about. The Queen of England died recently. You said you didn't want to comment about this. But she's a soul. So, she she's taking a new position. (2:52). You have Knowledge Seekers, there seem to be a group of souls, as there always is, a repositioning in these moments. Is there any significance why a soul in any position would take would move, regardless? Is it the fields strength is happening around the planet? Is the fields strength around the individual, the Soul?

K- It is individually based. It is Individually based. It's time. Now is, what you call, the Queen of England. A lot of things goes on till she's buried on Saturday, I think.

But essentially, my first reaction when I heard I said, "thanks God." One of the most evil souls has left us. A lot of people think her a different way. But we know what she's done

and what she's been up to. I think we might see a better, better life for humanity with Charles. But if you were aware of the conduct of this woman, trying to be. She's done a lot of evil things, very, very evil. And it doesn't matter. We don't get in conflict with another royal family, or whatever. But, she has been cause huge, huge, huge problems, personally.

You have to understand, when you have to be the only one, and you have to be, what you call it, the longer one, you do everything for the others not to be there. This behavior goes from the, when the time, before the time she even came into throne. Selfishness, and "I have to be the only one." (2:54). We've seen the whole series of the events in her lifetime. So, people look at it this way, we look at it as a fact, and what do you call it, as a whole. As I said, my reaction was, thanks God. Let's see if the other guy is different than this one.

We have now the same situation in Iran. We are aware, there are rumors and talks about Iranian leadership, and it's the same. We keep out of it, because we know what they really have done. It is not in public. Anybody who was better was eliminated, anyone who was more popular was eliminated. Anybody who was loved by public was somehow put aside. This was a habit of this woman. For it to be in that, only the best and the blah, it leads to a lot of crimes.

Q: .. I felt, being born in England and being part of the field strength. I did feel in the last few moments, I felt some very uncomfortable fields. And I started dreaming again, I haven't dreamt for many years, and I started dreaming. They were the sort of disruptive dreams and strange dreams. And I felt like there was an influence, being part of the Universal Council, and that you tend to find field strengths to come to you sometimes. I seem to have experienced that, I'm not claiming anything. But that's just me personally, what I've felt. (2:56). Now that that Soul has taken a new position, will the filtering system, will the Soul of the nation, the Soul, the healing process... will change?

K- Will change, will change, of course will change. She was one of the most selfish people known. This goes back decades. She had a habit of doing things her way. Nobody. I mean, if you look at it, the Diana situation. If you look at it with the wife of the new prince, who had to literally abdicate and go to Canada, why? Because they were more popular. There couldn't be another woman above her, that was more popular. Loved by the nation more, interacted with the nation more.

It's been the same with the revolution in Iran. The revolution in Iran was set by her. Because the King, the, what you call it, Iran royal structure was over 2,500 (years), and it had to end, because she had to be the longest. When we had the celebration of the 2,500 years of monarchy in Iran in 1970s. As an insult to Iran, she sent princess Ann, instead of. World leaders came. She sent Princess Ann. "Princess Ann" in Farsi means "shit," more or less. It was a biggest insult to the nation. Just because she already planned to end up monarchy, that she's the only one left. Historically she's done this all her life. (2:58).

For this to be, she has caused millions of people to suffer. Most of the Iranian refugees system we see, Iranians across the world is because of it. You see all the Libyans and Syrians, which are scattered around the world. She wanted to rob the central bank, because, where is the 140 billion, which was stolen from Libya central bank? It's in the Crown's name, not in the nation's name, Crown Jewels. Libyans are paying with their life. Syrians are paying with their life, and had to become assets of Crown Jewel of England.

All these British died in different places. Where does all their assets go? It's the same as time of Queen Victoria. The high seas robberies (pirates) became Lords. She has a very, very, very dark background to her life. Doesn't matter how you're trying to "butter it up," or how you want to paint it. She lived a devious life, extremely devious life. Maybe with Charles we'll see a different thing, because he tasted the pressures and the pains of it.

We see now. There are reports of the Ayatollah Khamenei of Iran, being in a dangerous position with his life. We see a new cycle of monarchy, Iran is getting born for, what we call, religious monarchy. We got rid of a Shah to have no monarchies. So, religious leaders have to come by the position of their intellect, not by birthright. These things gradually goes out of the way, anyway. This comes from wanting to gain power. If the people are there through their, (3:00). what you call, their rights of intellect, should not be the right of birth, even kingship is not ?? It's literally like Pope appointing, if he could have children as the, what you call it, as the next Pope, holding to power. And these things will change.

Q: ... So, if a Soul, if a person has this interaction as a child, does a Soul bring this from, if the Soul is pure and comes before pure into the physicality? Is this so? Or is there implications before?

K- There are implications before. The way, you always say, the way your DNA is made, imprint of the past, the color of the eye, and everything else. The same as with RNA. Those carry imprints into your Soul, but in a different way that the Soul knows the right and the wrong. That's where we get these things, the problems between the STP and the STM, wanting, and holding on to and imprinting. Knowledge is kept, but knowledge is not done. We do things, and then our future generation, in a way, balance it out, for it ??.

Q: So, are you saying that the nation of the UK will have to balance many of the field strengths that have happened over ?? ? (3:02).

K- They've always done, always done. It doesn't matter England, doesn't matter who. Always is done, always settled, always brought in the balance with its own. You think you get away with it, but long time, long term you see, you pay for it.

The best example of it is, the tribe of Moses, the longest tribe, they say we have history of, in so many ways. Look at them, what happened to them. Came a nomad, "out of the basket," and died nomad, and these people are still nomads. It has to be ingrained in the understanding, not force because of it.

A very good example of it is, Sheik Muhammad of Dubai built beautiful small cities around his Emirates, that the nomads could be put in. Beautifully furnished, woods, cupboards, doors and everything. These people are nomad. They're made in the tents. Some of the people in Dubai you see the city, going inside and you see the backwardness. So, he brought these people to live in these apartments, which was made by the government. Then after a while they saw there are no doors in the house, there are no wood frames, there are no kitchen, beds. The nomads took them and burned them in the middle of the kitchen, because that's how they were used to in the desert. By giving, does not bring intelligence and usage. You understand? (3:04). So, it is, but in the long term you pay for it. It balances the books.

Q: So the soul of. Many people through this discussion, it will upset many people. There are royalists and follow them. There is a whole ?? logic around this. I take no stance either way, just as a pure Soul, I just speak fact, not fact, however, just in a true sense what feels correct to me.

K- Yeah.

Q: So, the Soul, each Soul is responsible for their own conduct, as we know it?

K- Yeah, yeah.

Q: And they carry that fields strength. And inside themselves each person really will know the truth of whether they are approaching something in a magnetic or gravitational field, a positive or a negative. They would sense that in a split moment. And this is the Soul interaction that makes us very aware, but many people deny this.

K- It all depends. We deny a lot of things.

It's like what we are involved in Keshe Foundation. We set up a plan for Keshe Foundation about a year ago to bring it to a new dimension. We worked on it, we've done a lot of things on it. A few months ago we got you Knowledge Seekers involved with it. Some of you helped us to do it. But the thing is not happening.

I look at it as, there's a reason for it, it's not time, and place for it, maybe. Where, because if it happens it'll be fantastic for the whole change we're expecting. (3:06). I don't push it, because it means it's not the time and the day for it. When the time and day come for it, it will happen. We put a lot of effort into it. It's not that it's for me, it's because I know it will bring a massive change to the whole structure of humanity, what is about to happen. But do I go out to do different things with it? No.

And the people around are all waiting. We're all waiting for this thing to switch over, today, tomorrow, next week. It's been going for nearly a year. But why does it change? Why does it hold? Is it the time for it? I feel yes. The time is very short. When it comes, we all benefit by it, the whole humanity will benefit by it. It will bring changes beyond the imagination.

Did we have to wait for the Queen of England to die? Did we have to see a change in the Iranian leadership? Did we have to wait for Putin to go to Ukraine? Did we have to get

the Germans in another position? You can add anything to it, but it means the time (isn't right. That the Soul is not ready for it, that change. When it happens, it means it is ready to go. Because I know what's going to do.

Knowledge Seekers are not aware of what is about to hit humanity. I tell you, hold on to your seats, and hold on very tight, because when we come out, it's a hurricane, it's not just a wind. It's how, what benefit do bring me? Nothing, it's just that I see, it brings comfort, it brings advancement in technology and science, and brings man out of the war zones, and killing. That's the only purpose for, we are doing it. (3:08).

It does no matter how much we suffer a few weeks, a few days, but the end products is, no one is in charge, nobody's in crown, man decides and man elevates his own Soul. Just watch what can happen in a very short time. If what we set is achieved. Be careful with a lot things.

The thing is you all participated in it. In one way or another, small donations, loans to the Foundation, you all put your foot in it. So, we are all in for a change. The Foundation has put all its backing and assets to it, because I know it's time for change, and we take the leadership in doing it. And we have to do it the way man is doing it. The old song says, "it's a man's world." Let's see where we come, and then how the Souls will change, how we change ?? another.

Q: .. To what extent, if you permit, to what extent can we minimize the work of people? Because one, the education, the way they were raised in their environment, 2 the genetics, if they have learned only that in their family? To what extent they pay for that?

K- Pay for what? (3:10).

Q: Like a child who is, for example, is raised in a family of thieves, and the parents are thieves, and whenever he can cheat he is being applauded by parents and by grandparents, they touch the only value they know. And also the genetics, that has been the same way. How can the Soul be responsible?

K- It's the Soul who makes to carry on with the same decision. It's the Soul. And Soul goes back to his roots, if he wants to. We had this in Keshe Foundation.

In the Keshe Foundation, at the top, top, top levels of Keshe Foundation, we had this. A person who was born in one of the most notorious pedophile families in the world, family, the whole family's involved. Prison sentences for raping children, abusing children. Then prostitution it's like, you're going to work as a doctor, and it's carried on by the rest of the family. But the person knows it's wrong. For time, decides to change. But the pull of the what is born in, does not allow it. She goes back to it.

We had it in the highest levels of Keshe Foundation. Doesn't matter how hard the person tries, they cannot stop it. It's them who have to elevate their Soul. Then they blame everybody else for it. They have that choice. We had this in Keshe Foundation. (3:12).

They have to decide, they work hard to try to overcome it, or at least cover it. But it's you who has got to be on top of it. It can be done. But if it's brought for you, as say a thief, and the whole family is there, they do it, and they brought in it, and then its normality. It's their normality.

But it's one person who decides to bring the change. But would they pull back on it? Would what we had, to them has to be kept. They do their best to walk away from it, they cover it, but underneath they are doing it.

This was one of the reasons Keshe Foundation battled with the pedophile groups. Because they knew, right on the top there is somebody who has a history of prison sentence, and everything else, hiding underneath. We didn't know. But they knew. We washed out the Keshe Foundation with it. But it brought a lot of pain.

But they go back to it. They go back to their family. That's what they've done. The family, and it goes to the next generation. One of the most notorious pedophile families in Europe was sitting by the top of the Keshe Foundation. The father, the mother, uncles, everybody been to prison for abusing children. We had it, and I watched it. (3:14). Didn't know that was the situation.

And they've come (gone) back to roots, exactly where they found (find) comfort. Being in a good position (at top of KF) wasn't good enough. They chose. And the children are carrying on the same as their fathers are doing, abusing the next generation.

We've went in it with Rick, 5 or 6 years ago, we went through it. We couldn't understand how we are targeted so frequently, and with all these pedophiles. Then it just came open, it was obvious. They knew, they have a big point they can push it, and there was somebody who was supplying them. But, will they change? Even they pretend, they sit as a lady. The whole family has sent prison sentence for abusing children, establishing businesses to hide using the Keshe Foundation ?? . You cannot change their grain. But they have a choice to change. It's them who do not do it. Or it's too hard to go, not to go back to the past. (3:16).

If you see the past two or three years, we don't see much of it, these people around us. We got rid of the root. They came as the head of the education system, they brought their allies in different ways into Keshe Foundation. We couldn't understand how. We bless their Soul, I hope they find peace. But it's back to the old habits. nation and mother calls to carry on, because it's the behavior of the nation.

Any other question?

R: Well, I think you can, you wanted to wrap things up here Mr. Keshe. There's always more questions.

K- Let's see what comes up. So, if our team manages to complete, we will announce it, like I said, 24 hour notice, maybe. It'll be a good time in how we do, and then we'll invite

officials from the government to be with us online, or if they want to be present to see the process through, that we start the next phase of work.
Thank you very much indeed.
